Nursing

Draft / Pending Approval

Yadvir Read-Me First Complete Guide

Application, Signature, Catalog, Moodle, and Survey Readiness Operating Order

Document	Operating context
Packet status	Draft / Pending Approval
Use	Execution copy for signatures, submissions, Moodle handoff planning, catalog safe-language updates, and survey readiness
Boundary	Official forms remain standalone and unbranded; CI-created PDFs are wrapper, index, course, and handoff documents

Approval boundary: This packet uses Draft / Pending Approval language only. It does not claim CDPH, CDSS/ACS, BRN, or other government approval. Certificates remain disabled until agency approval metadata and completion evidence gates are satisfied.

Operating Order

Yadvir, this packet is being handed off for execution. The tracker is the source of truth. Update status as work progresses and continue through the next allowed step without waiting for TJ unless a true blocker appears.

Primary objective: Move the CNA/CDPH, RCFE/CDSS-ACS, and BRN/CEP application packets from clean packet review through signatures, submission, deficiency response if any, approval metadata tracking, Moodle handoff readiness, catalog and website safe-language updates, and survey readiness.

Working Tools

- Clean Google Drive end-user packet
- Signature and task tracker
- Master submission tracker
- Lane-specific submission checklists
- Missing or pending item PDFs
- Yadvir read-me guide
- Catalog and website update guide
- Moodle requirements-only folder
- Aldrin/Dagny post-SME handoff folder

Do not use: Do not use raw repo folders, scripts, source dumps, scattered Markdown files, old fragments, or unbranded draft fragments as submission materials.

Critical Holds

- Moodle development may not start until Vanessa Valerio, RN or another approved SME reviews and approves the course materials.
- Internal Vanessa/SME approval does not replace CDPH, CDSS/ACS, or BRN approval.
- No public approval claim, enrollment for approved credit, CE certificate release, or approved CE wording may be used until the applicable agency approval and issued metadata are received.
- Official government forms must remain unbranded and unaltered.
- Certificates remain disabled until agency approval metadata and completion evidence gates are satisfied.

Operating rule: Do not wait for TJ for routine execution. Update the tracker and continue through the next allowed step. Escalate only true blockers.

Escalate to TJ Only For True Blockers

- A required form is missing and cannot be located
- A signer refuses or requests wording changes
- Payment or check authority is unclear
- Vanessa/SME rejects course materials
- An agency deficiency requires content rewrite or legal/compliance decision
- Public website or catalog language requires approval status interpretation
- Approval metadata is received and certificate or public wording must be changed
- There is a conflict between packet materials and application instructions

Step 1 - Packet Intake

Review the clean Google Drive packet and confirm the packet is ready for lane-by-lane execution.

- Only PDFs and XLSX files are included
- Each lane has application submission and course materials folders
- Each lane has a minimum required submission packet PDF
- Official forms are ready for signature
- Missing or pending item PDFs and checklist spreadsheets are present
- Moodle requirements folder contains only requirements PDF and checklist spreadsheet
- Aldrin/Dagny handoff folder, Yadvir guide, and catalog/website guide are present

Tracker update: Status equals Packet Intake Complete or Correction Needed.

Step 2 - Lane Review

Lane	Confirm before signature routing	Tracker result
CNA / CDPH	24 online CE hours; 12 Moodle units x 2 hours; CCCC/NATP Modules 10-17 used only as source backbone; no clinical-hour claim; no retired 8 x 3 structure; no retired CNA ContentV2 sequence presented as current; CDPH forms, signatures, and payment items tracked.	Ready for Signature, Correction Needed, Missing Item, or Blocked
RCFE / CDSS-ACS	Current filed 9-course / 27-hour structure; LIC 9141 / LIC 9140 materials where applicable; Vanessa Valerio, RN 788389 evidence where source-backed; no future RCFE expansion concept as current; no Module 10-17 label applied to RCFE.	Ready for Signature, Correction Needed, Missing Item, or Blocked
BRN / CEP	30 contact hours; 10 modules x 3 contact hours; contact hours used as primary language; no outdated BRN hour wording; no BRN approval claim before issued metadata.	Ready for Signature, Correction Needed, Missing Item, or Blocked

Step 3 - Signatures, Dates, Initials, and Payments

- Identify every form needing signature, date, or initials
- Route signature-ready documents
- Collect signatures
- Verify dates are complete
- Verify payment or check requirement
- Save signed copies
- Update signature tracker
- Update missing/pending PDF if unresolved

Hold: Do not submit a lane if required signatures, dates, initials, attachments, or payments are missing.

Step 4 - Vanessa/SME Course Material Review

Route course materials to Vanessa Valerio, RN or another approved SME.

- SME must review course content, activity maps, question banks, completion/certificate rules, no-PHI/privacy guardrails, clinical and educational accuracy, and lane-specific terminology
- Record one result: SME Approved, SME Approved with Minor Corrections, or SME Rejected / Correction Required
- Moodle handoff remains blocked until SME approval is documented

Step 5 - Catalog and Website Pending-Language Update

Allowed pending labels	Allowed calls to action	Do not use
CNA Renewal Online CE - Draft / Pending CDPH Approval; RCFE Administrator Continuing Education - Draft / Pending CDSS/ACS Approval; RN Case Management Continuing Education - Draft / Pending BRN CEP Approval	Join Interest List; Request Information; Reviewer / Agency Access	Enroll Now; Start Course; Earn CEUs; Get Certificate; Approved CE; Certificate Available Now; BRN-approved course; CDSS-approved course; CDPH-approved online CE

Phone hold: Resolve the official primary phone number inconsistency before public updates. If unresolved, mark Pending owner confirmation - official primary phone number must be selected before public catalog/website release.

Step 6 - Application Submission

- Open the minimum required submission packet
- Confirm signed official forms
- Confirm payment or check
- Confirm required course materials

- Confirm instructor/SME evidence
- Confirm missing/pending items are resolved or non-blocking
- Submit through required agency channel
- Save proof of submission
- Record submission date, channel, confirmation, and next expected response

Tracker update: Status equals Submitted / Waiting on Agency.

Step 7 - Deficiency Response

- Save the deficiency notice
- Identify affected lane
- Log deficiency in tracker
- Classify deficiency type: form-related, payment-related, course-content-related, instructor-evidence-related, catalog/public-language-related, reviewer-access-related, or approval-metadata-related
- Assign owner
- Correct only the requested item
- Preserve original and corrected versions
- Prepare response cover page
- Submit through required channel
- Save confirmation
- Update tracker

Approval language: Do not change public approval language after deficiency response unless agency approval is actually issued.

Step 8 - Approval Metadata Received

- Record approval letter
- Record provider number
- Record course number
- Record approval date
- Record expiration date
- Record approved hours or contact hours
- Record approved course title
- Record required certificate wording
- Record reporting and record-retention conditions

Release rule: Only after metadata is verified may the related catalog, website, Moodle certificate gates, and certificate template be updated.

Step 9 - Aldrin/Dagny Moodle Handoff

Before SME approval, Aldrin and Dagny may review requirements for planning only.

- After SME approval, provide Moodle requirements PDF
- Provide raw course-content PDFs
- Provide workbooks and question-bank spreadsheets
- Provide activity maps
- Provide completion rules
- Provide certificate gate rules
- Provide reviewer access requirements
- Provide no-PHI/privacy rules
- Provide implementation tracker

Production hold: Production build and learner access remain blocked until agency approval metadata is issued where required.

Step 10 - Moodle Build QA

- Create course shells
- Import content
- Import quizzes
- Configure completion tracking
- Configure evaluations
- Configure reviewer access
- Configure no-PHI warnings
- Keep certificate disabled until approval metadata and completion evidence gates are satisfied
- Test learner completion report
- Test quiz report
- Test evidence export
- Test certificate gate lock
- Test reviewer access

Step 11 - Survey Readiness

- Submitted application packet
- Proof of submission
- Approval letters / metadata
- Signed official forms
- Course materials
- SME approval record
- Instructor evidence
- Catalog addendum
- Website screenshots showing correct approval language
- Moodle course access instructions
- Reviewer credentials
- Moodle requirements PDF
- Activity completion rules
- Quiz settings
- Certificate gate settings
- Sample learner completion evidence
- Deficiency log and responses
- Record-retention evidence
- No-PHI/privacy controls
- Accessibility and technical support information

Create or update: Survey binder, survey tracker, reviewer access sheet, and evidence index.

Step 12 - Survey / Reviewer Event

- Use the survey binder as the source of truth
- Provide only requested evidence
- Do not improvise approval claims
- Log every request
- Mark uncertain items as pending follow-up
- Assign owner and due date
- Save all reviewer correspondence
- Update deficiency log if findings are issued

Daily Update Requirement

Daily status item	Required content
1. Completed today	Work completed since the last update

Daily status item	Required content
2. Blockers	Only true blockers requiring escalation
3. Decisions needed	Specific decision, owner, and due date
4. Signatures pending	Signer, document, and follow-up action
5. Submissions pending	Lane, missing item, and target date
6. Deficiencies received	Agency, lane, deficiency class, and owner
7. Next 3 actions	Immediate next allowed actions
8. Tracker updated	Yes or no

Do not wait: Do not wait for TJ unless the item is a true blocker.
