Draft / Pending Approval

Master End-User Packet Index

Clean packet map, execution sequence, lane controls, and approval holds

Document	Operating context
Packet status	Draft / Pending Approval
Use	Execution copy for signatures, submissions, Moodle handoff planning, catalog safe-language updates, and survey readiness
Boundary	Official forms remain standalone and unbranded; CI-created PDFs are wrapper, index, course, and handoff documents

Approval boundary: This packet uses Draft / Pending Approval language only. It does not claim CDPH, CDSS/ACS, BRN, or other government approval. Certificates remain disabled until agency approval metadata and completion evidence gates are satisfied.

How to Use This Packet

Use this clean Google Drive packet as the execution copy. Do not use raw repo folders, source dumps, scattered Markdown files, old fragments, or unbranded draft fragments as submission materials.

- Start with the Yadvir guide
- Use the master submission tracker as the source of truth
- Work each lane through packet intake, lane review, signatures, SME review, submission, deficiency response, approval metadata, Moodle handoff, and survey readiness

Yadvir Operating Order Summary

- Tracker is the source of truth; update it and continue to the next allowed step without waiting for TJ unless a true blocker appears.
- Moodle development may not start until Vanessa Valerio, RN or another approved SME reviews and approves the course materials.
- Internal SME approval does not replace CDPH, CDSS/ACS, or BRN approval.
- No public approval claim, enrollment for approved credit, CE certificate release, or approved CE wording may be used until applicable agency approval and metadata are received.
- Certificates remain disabled until agency approval metadata and completion evidence gates are satisfied.
- Official government forms and CCCCO/NATP source pages remain unbranded and unaltered.
