RCFE / CDSS CETP Raw LMS Course Content for Post-SME Build

Converted from canonical Moodle-ready course content markdown into clean PDF for Drive handoff

LMS development may not start until Vanessa Valerio, RN or another approved SME has reviewed and approved the course materials. Internal SME approval is required before Aldrin/Dagny begin Moodle course-shell build, content import, quiz import, learner-access configuration, certificate setup, or production implementation. SME approval does not replace agency approval.

RCFE Course Content Index

Status: Draft / Pending CDSS/ACS Approval

Purpose: Moodle-ready learner course content for the filed RCFE Administrator / CDSS CETP lane. This package contains actual learner course content, Moodle build settings, completion controls, and an import-ready question bank for the current filed 9-course / 27-hour structure.

Current/future boundary: The current RCFE build is exactly 9 LIC 9140 courses totaling 27 hours. The future 40-hour / 12-module RCFE concept is excluded from current learner content, must not be built from this folder as current approval content, and must not be presented as current.

Instructor status: Vanessa Valerio, RN 788389 is used where source-backed by the RCFE LIC 9140 transfer worksheets and instructor evidence index. Instructor evidence attachment/currentness remains final verification.

RCFE Administrator 9-Course / 27-Hour Moodle Course Content

Status: Draft / Pending CDSS/ACS Approval

Provider/vendor: CI Institute of Nursing, Inc. Instructor of record: Vanessa Valerio, RN 788389

This is Moodle-ready learner course content for the current filed RCFE Administrator / CDSS CETP lane. It is not a requirements-only document. Each course below is structured for Moodle build using Page, H5P/Lesson, Forum/Choice/Feedback, Quiz, Feedback, and Completion Gate activity blocks.

Current/future boundary: build only the 9 filed LIC 9140 courses totaling 27 hours. The future 40-hour / 12-module concept is excluded from current Moodle content and must not be presented as current.

RCFE-CETP-001 - RCFE Laws, Regulations, Policies, and Standards

Field	Moodle-ready value
Course ID	RCFE-CETP-001
Course title	RCFE Laws, Regulations, Policies, and Standards
Filed source title	RCFE Laws, Regulations, Policies, and Procedural Standards
Filed course hours	4
CDSS/RCFE core knowledge category	Laws, Regulations, Policies, and Procedural Standards Impacting RCFE
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course prepares RCFE administrators to identify and apply current California RCFE statutory, regulatory, policy, and procedural standards in daily operations, incident response, documentation, and compliance decision-making.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify the role of Health and Safety Code section 1569 and Title 22, Division 6, Chapter 8 in RCFE operations.
- ? Differentiate licensing, certification, mandated reporting, complaint, personal rights, and recordkeeping obligations.
- ? Apply a regulatory cross-check process before implementing a policy or operational change.
- ? Recognize situations requiring escalation before public claims, certificates, or CDSS submissions are made.

Page: Lesson Content

Hour 1: RCFE legal framework and official-source navigation

Learners map the relationship among statute, regulation, CDSS/CCLD guidance, facility policy, and administrator action. The lesson emphasizes that administrators must confirm requirements from official sources before changing operations or making public-facing statements.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Title 22 duties, mandated reporting, confidentiality, and complaints

Learners review how regulatory duties become daily controls: confidential resident information is protected, complaints are handled without retaliation, mandated reports are made through approved channels, and rights issues are documented objectively.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 3: Policies, procedural controls, documentation, and escalation

Learners practice converting a broad requirement into a usable facility procedure. The lesson focuses on policy ownership, review cycles, version control, staff communication, and escalation when interpretation is uncertain.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 4: Applied regulatory scenarios

Learners work through admissions, incident, record, and marketing-language scenarios. Each scenario requires the administrator to identify the controlling source, decide the next action, document the rationale, and avoid premature approval claims.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	RCFE legal framework and official-source navigation	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Title 22 duties, mandated reporting, confidentiality, and complaints	Page view, activity completion, response/submission timestamp
3	Page + H5P/Lesson + participation prompt	Policies, procedural controls, documentation, and escalation	Page view, activity completion, response/submission timestamp
4	Page + H5P/Lesson + participation prompt	Applied regulatory scenarios	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A fictional RCFE receives a notice that its complaint poster is outdated and its policy binder still refers to an obsolete procedure. The administrator must correct the posting, update the policy, communicate the change to staff, and document a plan to prevent recurrence.

Administrator activity: Build a one-page regulatory cross-check and corrective-action memo with source checked, risk identified, immediate correction, staff communication, record location, and follow-up date.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: select the controlling source for a sample operating requirement.

? Forum prompt: describe one policy area that should be source-checked before implementation.

? H5P matching: match regulatory terms to administrator actions.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 40 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q001	Which administrator action best supports Title 22 in RCFE-CETP-001?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q002	A learner sees a scenario involving Health and Safety Code. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q003	Which documentation entry is most defensible for Community Care Licensing?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q004	When Plan of Correction raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q005	Which choice would create the greatest compliance risk for mandated reporting?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q006	What evidence should Moodle retain for an activity about personal rights?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q007	How should an instructor respond when a participant answers incorrectly about complaint procedure?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q008	Which statement best fits the administrator scope for recordkeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q009	What should happen before completion credit is issued for public approval claim?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q010	Why is a fictional scenario appropriate for practicing policy review?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q011	Which administrator action best supports Title 22 in RCFE-CETP-001?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q012	A learner sees a scenario involving Health and Safety Code. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q013	Which documentation entry is most defensible for Community Care Licensing?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q014	When Plan of Correction raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q015	Which choice would create the greatest compliance risk for mandated reporting?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q016	What evidence should Moodle retain for an activity about personal rights?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q017	How should an instructor respond when a participant answers incorrectly about complaint procedure?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q018	Which statement best fits the administrator scope for recordkeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q019	What should happen before completion credit is issued for public approval claim?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q020	Why is a fictional scenario appropriate for practicing policy review?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q021	Which administrator action best supports Title 22 in RCFE-CETP-001?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q022	A learner sees a scenario involving Health and Safety Code. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q023	Which documentation entry is most defensible for Community Care Licensing?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q024	When Plan of Correction raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q025	Which choice would create the greatest compliance risk for mandated reporting?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q026	What evidence should Moodle retain for an activity about personal rights?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q027	How should an instructor respond when a participant answers incorrectly about complaint procedure?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q028	Which statement best fits the administrator scope for recordkeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q029	What should happen before completion credit is issued for public approval claim?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q030	Why is a fictional scenario appropriate for practicing policy review?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q031	Which administrator action best supports Title 22 in RCFE-CETP-001?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q032	A learner sees a scenario involving Health and Safety Code. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q033	Which documentation entry is most defensible for Community Care Licensing?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q034	When Plan of Correction raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q035	Which choice would create the greatest compliance risk for mandated reporting?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q036	What evidence should Moodle retain for an activity about personal rights?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q037	How should an instructor respond when a participant answers incorrectly about complaint procedure?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q038	Which statement best fits the administrator scope for recordkeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Question name	Question text	Correct	Rationale
RCFE-CETP-001_Q039	What should happen before completion credit is issued for public approval claim?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.
RCFE-CETP-001_Q040	Why is a fictional scenario appropriate for practicing policy review?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Laws, Regulations, Policies, and Procedural Standards Impacting RCFE.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-002 - Alzheimer's Disease and Related Dementias: Person-Centered Care Foundations

Field	Moodle-ready value
Course ID	RCFE-CETP-002
Course title	Alzheimer's Disease and Related Dementias: Person-Centered Care Foundations
Filed source title	Alzheimer's Disease and Related Dementias: Person-Centered Care Foundations
Filed course hours	4
CDSS/RCFE core knowledge category	Managing Alzheimer's Disease and Related Dementias
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course focuses on dementia-care foundations for RCFE administrators, including person-centered approaches, communication, behavior interpretation, individualized service planning, staff direction, and documentation expectations.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Describe common dementia-related changes that affect communication, behavior, safety, and care planning.
- ? Identify non-pharmacologic, person-centered strategies for responding to distress and unmet needs.
- ? Connect dementia care practices to RCFE assessment, service planning, supervision, and documentation responsibilities.
- ? Evaluate whether staff instructions align with resident dignity, safety, and regulatory expectations.

Page: Lesson Content

Hour 1: Dementia overview and administrator implications

Learners review common cognitive, functional, behavioral, and communication changes seen in Alzheimer's disease and related dementias. The administrator lens is care planning, staff direction, documentation, and escalation rather than diagnosis.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Communication, unmet needs, and de-escalation

Learners practice interpreting behavior as communication. The lesson emphasizes approach, validation, cueing, environmental adjustment, pain or discomfort review, and non-pharmacologic responses before escalation.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 3: Individualized planning, family communication, and staff coaching

Learners connect resident history, routines, preferences, and abilities to needs and services planning. Administrators practice coaching staff in language that preserves dignity and avoids judgmental labels.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 4: Case application and documentation

Learners apply person-centered dementia foundations to a fictional case involving distress during care. The activity requires resident-centered interventions, staff instructions, family communication boundaries, and documentation.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Dementia overview and administrator implications	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Communication, unmet needs, and de-escalation	Page view, activity completion, response/submission timestamp
3	Page + H5P/Lesson + participation prompt	Individualized planning, family communication, and staff coaching	Page view, activity completion, response/submission timestamp
4	Page + H5P/Lesson + participation prompt	Case application and documentation	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A resident with moderate dementia becomes distressed during evening care and repeatedly asks to go home. Staff disagree about whether the resident is being non-compliant or frightened.

Administrator activity: Create a person-centered response plan with likely unmet need, communication approach, environmental adjustment, staff coaching points, documentation note, and escalation triggers.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: identify the most person-centered first response to distress.

? Forum prompt: rewrite a judgmental staff note into objective, dignity-preserving language.

? H5P branching: choose responses in a dementia communication scenario.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 40 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-002_Q001	Which administrator action best supports Alzheimer's disease in RCFE-CETP-002?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q002	A learner sees a scenario involving related dementia. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q003	Which documentation entry is most defensible for person-centered care?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q004	When validation raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q005	Which choice would create the greatest compliance risk for redirection?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q006	What evidence should Moodle retain for an activity about unmet need?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q007	How should an instructor respond when a participant answers incorrectly about behavior as communication?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q008	Which statement best fits the administrator scope for staff coaching?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q009	What should happen before completion credit is issued for service plan?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q010	Why is a fictional scenario appropriate for practicing objective documentation?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing Alzheimer's Disease and Related Dementias.

Question name	Question text	Correct	Rationale
RCFE-CETP-002_Q011	Which administrator action best supports Alzheimer's disease in RCFE-CETP-002?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q012	A learner sees a scenario involving related dementia. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing Alzheimer's Disease and Related Dementias.

RCFE-CETP-002_Q023	Which documentation entry is most defensible for person-centered care?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q024	When validation raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q025	Which choice would create the greatest compliance risk for redirection?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q026	What evidence should Moodle retain for an activity about unmet need?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q027	How should an instructor respond when a participant answers incorrectly about behavior as communication?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q028	Which statement best fits the administrator scope for staff coaching?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q029	What should happen before completion credit is issued for service plan?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q030	Why is a fictional scenario appropriate for practicing objective documentation?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing Alzheimer's Disease and Related Dementias.

Question name	Question text	Correct	Rationale
RCFE-CETP-002_Q031	Which administrator action best supports Alzheimer's disease in RCFE-CETP-002?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q032	A learner sees a scenario involving related dementia. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q033	Which documentation entry is most defensible for person-centered care?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q034	When validation raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q035	Which choice would create the greatest compliance risk for redirection?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q036	What evidence should Moodle retain for an activity about unmet need?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q037	How should an instructor respond when a participant answers incorrectly about behavior as communication?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q038	Which statement best fits the administrator scope for staff coaching?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q039	What should happen before completion credit is issued for service plan?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-002_Q040	Why is a fictional scenario appropriate for practicing objective documentation?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing Alzheimer's Disease and Related Dementias.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-003 - Alzheimer's Disease and Related Dementias: Safety, Environment, and Documentation

Field	Moodle-ready value
Course ID	RCFE-CETP-003
Course title	Alzheimer's Disease and Related Dementias: Safety, Environment, and Documentation
Filed source title	Alzheimer's Disease and Related Dementias: Safety, Environment, and Documentation
Filed course hours	4
CDSS/RCFE core knowledge category	Managing Alzheimer's Disease and Related Dementias

Field	Moodle-ready value
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course expands dementia CE coverage by focusing on environmental safety, restricted access considerations, dangerous-item controls, staff monitoring, activity adaptation, care-plan updates, and incident documentation.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify environmental and supervision controls relevant to residents living with dementia.
- ? Evaluate dementia-care safety risks involving egress, dangerous items, nutrition, hydration, and activities.
- ? Document safety observations, interventions, family communication, and service-plan updates accurately.
- ? Recognize when a change in condition requires reassessment, care coordination, or leadership escalation.

Page: Lesson Content

Hour 1: Dementia-related environmental safety

Learners evaluate how lighting, noise, wayfinding, egress controls, dangerous-item storage, and supervision patterns affect residents living with dementia. Controls must reduce risk without using punitive or dignity-reducing practices.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Activities, nutrition, hydration, sleep, and wandering risk

Learners connect dementia symptoms to daily safety risks. The lesson covers cueing, routine, hydration prompts, activity adaptation, rest patterns, and staff handoff communication for wandering or exit-seeking risk.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 3: Observation, charting, plan updates, and family communication

Learners practice documenting objective observations and updating service-plan instructions. The content highlights when a trend or incident should trigger reassessment, provider contact, or leadership review.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 4: Scenario review and safety documentation

Learners audit a fictional environment, identify preventable risks, and write a documentation note that connects observation, action taken, notifications, and follow-up.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Dementia-related environmental safety	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Activities, nutrition, hydration, sleep, and wandering risk	Page view, activity completion, response/submission timestamp
3	Page + H5P/Lesson + participation prompt	Observation, charting, plan updates, and family communication	Page view, activity completion, response/submission timestamp
4	Page + H5P/Lesson + participation prompt	Scenario review and safety documentation	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A resident living with dementia is found near an unlocked storage area after skipping lunch and pacing. Staff notes are inconsistent and do not show what was changed after the event.

Administrator activity: Complete an environmental and documentation review with immediate safety control, resident-centered explanation, care-plan update, staff handoff instruction, and follow-up monitoring.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: choose the least restrictive safety control.

? Forum prompt: list two environmental changes that support wayfinding and dignity.

? H5P audit: identify hazards in a fictional memory-care environment.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 40 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-003_Q001	Which administrator action best supports environmental safety in RCFE-CETP-003?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q002	A learner sees a scenario involving egress awareness. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q003	Which documentation entry is most defensible for dangerous item control?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing Alzheimer's Disease and Related Dementias.

Question name	Question text	Correct	Rationale
RCFE-CETP-003_Q004	When wandering risk raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q005	Which choice would create the greatest compliance risk for hydration cueing?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q006	What evidence should Moodle retain for an activity about activity adaptation?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q007	How should an instructor respond when a participant answers incorrectly about care-plan update?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q008	Which statement best fits the administrator scope for family communication?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q009	What should happen before completion credit is issued for incident documentation?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q010	Why is a fictional scenario appropriate for practicing least restrictive control?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q011	Which administrator action best supports environmental safety in RCFE-CETP-003?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q012	A learner sees a scenario involving egress awareness. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q013	Which documentation entry is most defensible for dangerous item control?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing Alzheimer's Disease and Related Dementias.

Question name	Question text	Correct	Rationale
RCFE-CETP-003_Q014	When wandering risk raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q015	Which choice would create the greatest compliance risk for hydration cueing?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q016	What evidence should Moodle retain for an activity about activity adaptation?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q017	How should an instructor respond when a participant answers incorrectly about care-plan update?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q018	Which statement best fits the administrator scope for family communication?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q019	What should happen before completion credit is issued for incident documentation?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q020	Why is a fictional scenario appropriate for practicing least restrictive control?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing Alzheimer's Disease and Related Dementias.
RCFE-CETP-003_Q021	Which administrator action best supports environmental safety in RCFE-CETP-003?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing Alzheimer's Disease and Related Dementias.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.

- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-004 - Resident Rights, Dignity, and Abuse Prevention

Field	Moodle-ready value
Course ID	RCFE-CETP-004
Course title	Resident Rights, Dignity, and Abuse Prevention
Filed source title	Resident Rights, Dignity, Councils, and Abuse Prevention
Filed course hours	2
CDSS/RCFE core knowledge category	Residents' Rights
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course prepares administrators to operationalize RCFE resident rights through staff training, care planning, family communication, resident and family councils, abuse-prevention controls, and complaint response.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify key RCFE resident rights and operational practices that protect dignity and choice.
- ? Recognize staff behaviors and facility practices that may create resident-rights risk.
- ? Apply a complaint and abuse-prevention escalation process consistent with claim-safe training standards.

Page: Lesson Content

Hour 1: Resident rights, dignity, privacy, choice, councils, and complaints

Learners review how rights become daily practice: privacy during care, meaningful choice, access to visitors and councils, respectful communication, grievance pathways, and freedom from retaliation.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Abuse-prevention controls, documentation, escalation, and correction

Learners identify warning signs of abuse, neglect, exploitation, and rights violations. The lesson emphasizes reporting suspected concerns, preserving resident safety, documenting objective facts, and correcting staff practice.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Resident rights, dignity, privacy, choice, councils, and complaints	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Abuse-prevention controls, documentation, escalation, and correction	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A resident reports that a staff member spoke harshly, ignored privacy during care, and discouraged the resident from bringing a concern to the family council.

Administrator activity: Prepare a rights-respecting response plan with immediate safety check, complaint pathway, mandated-reporting screen, documentation note, staff coaching, and non-retaliation safeguard.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: identify the resident right at risk in a short vignette.

? Forum prompt: write one staff coaching statement that preserves dignity.

? Feedback activity: select required elements of an objective rights-concern note.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 20 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-004_Q001	Which administrator action best supports resident rights in RCFE-CETP-004?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Residents' Rights.
RCFE-CETP-004_Q002	A learner sees a scenario involving dignity. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Residents' Rights.

Filed course hours	4
CDSS/RCFE core knowledge category	Medication Management
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course addresses administrator-level medication management responsibilities, including assistance with self-administered medications, storage, documentation, disposal, communication, error prevention, and escalation.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Differentiate administrator oversight duties from clinical medication decision-making.
- ? Identify common medication documentation, storage, disposal, and communication controls in RCFE operations.
- ? Recognize medication-error risk patterns and escalation triggers.
- ? Apply a medication-management audit checklist to sample scenarios.

Page: Lesson Content

Hour 1: Medication management framework and communication chain

Learners clarify the administrator's oversight role: policies, staff training, resident profiles, physician and pharmacy communication, and escalation when orders or instructions are unclear. The course does not teach clinical prescribing or nursing judgment.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Storage, labels, records, PRN awareness, and disposal

Learners review centrally stored medication controls, labeling, medication records, PRN documentation awareness, refusal documentation, disposal handling, and access controls. The emphasis is audit readiness and resident safety.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 3: Errors, staff training, observation, and incident review

Learners analyze common medication-risk patterns, such as changed orders not reflected in records, missed documentation, unclear pharmacy communication, refusals, and shift handoff gaps.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 4: Scenario audit and corrective action

Learners complete a medication-management audit for a fictional resident record and decide what must be corrected, clarified, documented, and escalated.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Medication management framework and communication chain	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Storage, labels, records, PRN awareness, and disposal	Page view, activity completion, response/submission timestamp
3	Page + H5P/Lesson + participation prompt	Errors, staff training, observation, and incident review	Page view, activity completion, response/submission timestamp
4	Page + H5P/Lesson + participation prompt	Scenario audit and corrective action	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A fictional MAR shows a changed dose, one missed signature, and a family report that the resident refused a medication. The staff handoff does not clearly show what was communicated to the physician or pharmacy.

Administrator activity: Complete a medication audit checklist and corrective-action note with discrepancy, immediate safety step, communication chain, documentation correction, staff coaching, and follow-up.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through

Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: distinguish oversight from clinical decision-making.

? Forum prompt: identify one medication-record risk and its administrator control.

? H5P audit: review a fictional MAR and flag missing elements.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 40 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-005_Q001	Which administrator action best supports medication assistance in RCFE-CETP-005?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Medication Management.
RCFE-CETP-005_Q002	A learner sees a scenario involving self-administration. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Medication Management.
RCFE-CETP-005_Q003	Which documentation entry is most defensible for MAR?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Medication Management.
RCFE-CETP-005_Q004	When physician order raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Medication Management.
RCFE-CETP-005_Q005	Which choice would create the greatest compliance risk for pharmacy communication?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Medication Management.
RCFE-CETP-005_Q006	What evidence should Moodle retain for an activity about PRN?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Medication Management.
RCFE-CETP-005_Q007	How should an instructor respond when a participant answers incorrectly about refusal?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Medication Management.
RCFE-CETP-005_Q008	Which statement best fits the administrator scope for storage?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Medication Management.

Question name	Question text	Correct	Rationale
RCFE-CETP-005_Q009	What should happen before completion credit is issued for disposal?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Medication Management.
RCFE-CETP-005_Q010	Why is a fictional scenario appropriate for practicing medication error?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Medication Management.
RCFE-CETP-005_Q011	Which administrator action best supports medication assistance in RCFE-CETP-005?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Medication Management.
RCFE-CETP-005_Q012	A learner sees a scenario involving self-administration. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Medication Management.
RCFE-CETP-005_Q013	Which documentation entry is most defensible for MAR?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Medication Management.
RCFE-CETP-005_Q014	When physician order raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Medication Management.
RCFE-CETP-005_Q015	Which choice would create the greatest compliance risk for pharmacy communication?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Medication Management.
RCFE-CETP-005_Q016	What evidence should Moodle retain for an activity about PRN?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Medication Management.
RCFE-CETP-005_Q017	How should an instructor respond when a participant answers incorrectly about refusal?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Medication Management.
RCFE-CETP-005_Q018	Which statement best fits the administrator scope for storage?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Medication Management.
RCFE-CETP-005_Q019	What should happen before completion credit is issued for disposal?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Medication Management.

Question name	Question text	Correct	Rationale
RCFE-CETP-005_Q020	Why is a fictional scenario appropriate for practicing medication error?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Medication Management.
RCFE-CETP-005_Q021	Which administrator action best supports medication assistance in RCFE-CETP-005?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Medication Management.
RCFE-CETP-005_Q022	A learner sees a scenario involving self-administration. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Medication Management.
RCFE-CETP-005_Q023	Which documentation entry is most defensible for MAR?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Medication Management.
RCFE-CETP-005_Q024	When physician order raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Medication Management.
RCFE-CETP-005_Q025	Which choice would create the greatest compliance risk for pharmacy communication?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Medication Management.
RCFE-CETP-005_Q026	What evidence should Moodle retain for an activity about PRN?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Medication Management.
RCFE-CETP-005_Q027	How should an instructor respond when a participant answers incorrectly about refusal?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Medication Management.
RCFE-CETP-005_Q028	Which statement best fits the administrator scope for storage?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Medication Management.
RCFE-CETP-005_Q029	What should happen before completion credit is issued for disposal?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Medication Management.
RCFE-CETP-005_Q030	Why is a fictional scenario appropriate for practicing medication error?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Medication Management.

Question name	Question text	Correct	Rationale
RCFE-CETP-005_Q031	Which administrator action best supports medication assistance in RCFE-CETP-005?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Medication Management.
RCFE-CETP-005_Q032	A learner sees a scenario involving self-administration. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Medication Management.
RCFE-CETP-005_Q033	Which documentation entry is most defensible for MAR?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Medication Management.
RCFE-CETP-005_Q034	When physician order raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Medication Management.
RCFE-CETP-005_Q035	Which choice would create the greatest compliance risk for pharmacy communication?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Medication Management.
RCFE-CETP-005_Q036	What evidence should Moodle retain for an activity about PRN?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Medication Management.
RCFE-CETP-005_Q037	How should an instructor respond when a participant answers incorrectly about refusal?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Medication Management.
RCFE-CETP-005_Q038	Which statement best fits the administrator scope for storage?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Medication Management.
RCFE-CETP-005_Q039	What should happen before completion credit is issued for disposal?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Medication Management.
RCFE-CETP-005_Q040	Why is a fictional scenario appropriate for practicing medication error?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Medication Management.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-006 - Admission, Retention, Reappraisal, and Needs/Services Plans

Field	Moodle-ready value
Course ID	RCFE-CETP-006
Course title	Admission, Retention, Reappraisal, and Needs/Services Plans
Filed source title	Admission, Retention, Reappraisal, and Needs and Services Plans
Filed course hours	3
CDSS/RCFE core knowledge category	Resident Admission, Retention, and Assessment Procedures
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course prepares administrators to manage admission and retention decisions, pre-admission appraisal, physician documentation, reappraisal, needs and services plans, and escalation when resident needs change.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify records and decision points used in RCFE admission and retention review.
- ? Explain how appraisal, physician reports, and service planning guide resident care decisions.
- ? Recognize when a change in condition requires reappraisal, external coordination, or leadership review.
- ? Apply documentation controls to sample admission and retention scenarios.

Page: Lesson Content

Hour 1: Admission screening and required records

Learners sequence admission screening, pre-admission appraisal, physician documentation, resident characteristics, care capability, and admission-agreement linkage. The focus is making a defensible fit decision before admission.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Needs and services plans and reappraisal triggers

Learners translate assessed needs into service-plan instructions that staff can follow. The lesson covers condition changes, incidents, family/provider communication, and objective documentation that supports reappraisal.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 3: Retention, relocation awareness, escalation, and record audit

Learners review retention limits and how to respond when resident needs may exceed facility capability. The activity emphasizes escalation before final decisions and careful documentation of notices, options, and resident dignity.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Admission screening and required records	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Needs and services plans and reappraisal triggers	Page view, activity completion, response/submission timestamp
3	Page + H5P/Lesson + participation prompt	Retention, relocation awareness, escalation, and record audit	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A resident has repeated falls, new wandering, and family disagreement about whether the facility can still meet the resident's needs.

Administrator activity: Draft an updated needs/services plan and a retention review memo with assessed need, current supports, additional controls, escalation contacts, documentation evidence, and decision rationale.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: identify a reappraisal trigger.

? Forum prompt: write one measurable service-plan instruction.

? H5P sequencing: arrange admission records in the correct workflow.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 30 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-006_Q001	Which administrator action best supports pre-admission appraisal in RCFE-CETP-006?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q002	A learner sees a scenario involving physician report. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q003	Which documentation entry is most defensible for admission agreement?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q004	When needs and services plan raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q005	Which choice would create the greatest compliance risk for reappraisal?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q006	What evidence should Moodle retain for an activity about retention?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q007	How should an instructor respond when a participant answers incorrectly about relocation?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Resident Admission, Retention, and Assessment Procedures.

Question name	Question text	Correct	Rationale
RCFE-CETP-006_Q008	Which statement best fits the administrator scope for care capability?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q009	What should happen before completion credit is issued for condition change?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q010	Why is a fictional scenario appropriate for practicing decision memo?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q011	Which administrator action best supports pre-admission appraisal in RCFE-CETP-006?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q012	A learner sees a scenario involving physician report. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q013	Which documentation entry is most defensible for admission agreement?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q014	When needs and services plan raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q015	Which choice would create the greatest compliance risk for reappraisal?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q016	What evidence should Moodle retain for an activity about retention?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Resident Admission, Retention, and Assessment Procedures.

Question name	Question text	Correct	Rationale
RCFE-CETP-006_Q017	How should an instructor respond when a participant answers incorrectly about relocation?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q018	Which statement best fits the administrator scope for care capability?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q019	What should happen before completion credit is issued for condition change?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q020	Why is a fictional scenario appropriate for practicing decision memo?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q021	Which administrator action best supports pre-admission appraisal in RCFE-CETP-006?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q022	A learner sees a scenario involving physician report. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q023	Which documentation entry is most defensible for admission agreement?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q024	When needs and services plan raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q025	Which choice would create the greatest compliance risk for reappraisal?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Resident Admission, Retention, and Assessment Procedures.

Question name	Question text	Correct	Rationale
RCFE-CETP-006_Q026	What evidence should Moodle retain for an activity about retention?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q027	How should an instructor respond when a participant answers incorrectly about relocation?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q028	Which statement best fits the administrator scope for care capability?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q029	What should happen before completion credit is issued for condition change?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Resident Admission, Retention, and Assessment Procedures.
RCFE-CETP-006_Q030	Why is a fictional scenario appropriate for practicing decision memo?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Resident Admission, Retention, and Assessment Procedures.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-007 - Emergency Procedures and Environmental Controls

Field	Moodle-ready value
Course ID	RCFE-CETP-007
Course title	Emergency Procedures and Environmental Controls
Filed source title	Emergency Procedures and Physical Environment Controls
Filed course hours	2
CDSS/RCFE core knowledge category	Managing the Physical Environment
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course addresses administrator controls for physical environment safety, emergency procedures, maintenance, housekeeping, passageways, hazardous materials, water and temperature considerations, and disaster-plan readiness.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify physical-environment risks that affect resident safety in RCFE settings.
- ? Apply an emergency and environmental readiness checklist to sample facility scenarios.
- ? Recognize documentation and escalation controls for environmental hazards and disaster readiness.

Page: Lesson Content

Hour 1: Physical environment requirements and safety checks

Learners evaluate passageways, housekeeping, maintenance, hazardous storage, temperature concerns, water safety, and routine safety checks. The administrator focus is prevention, documentation, and timely correction.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Emergency procedures, disaster readiness, drills, and communication

Learners review disaster-plan readiness, evacuation or shelter-in-place communication, supplies, drills, resident-specific needs, and after-action documentation.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Physical environment requirements and safety checks	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Emergency procedures, disaster readiness, drills, and communication	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: During a mock drill, a blocked exit, missing flashlight batteries, and incomplete resident mobility notes slow the evacuation process.

Administrator activity: Complete an after-action improvement plan with hazard, immediate correction, resident-specific consideration, staff communication, drill evidence, and follow-up date.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: select the highest-priority environmental hazard.

? Forum prompt: name one emergency-plan element that must stay current.

? Feedback checklist: mark whether sample drill evidence is complete.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 20 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-007_Q001	Which administrator action best supports emergency procedure in RCFE-CETP-007?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q002	A learner sees a scenario involving disaster plan. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing the Physical Environment.

Question name	Question text	Correct	Rationale
RCFE-CETP-007_Q003	Which documentation entry is most defensible for evacuation?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q004	When shelter in place raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q005	Which choice would create the greatest compliance risk for passageway?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q006	What evidence should Moodle retain for an activity about hazardous storage?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q007	How should an instructor respond when a participant answers incorrectly about maintenance?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q008	Which statement best fits the administrator scope for housekeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q009	What should happen before completion credit is issued for drill?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q010	Why is a fictional scenario appropriate for practicing after-action report?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q011	Which administrator action best supports emergency procedure in RCFE-CETP-007?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q012	A learner sees a scenario involving disaster plan. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Managing the Physical Environment.

Question name	Question text	Correct	Rationale
RCFE-CETP-007_Q013	Which documentation entry is most defensible for evacuation?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q014	When shelter in place raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q015	Which choice would create the greatest compliance risk for passageway?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q016	What evidence should Moodle retain for an activity about hazardous storage?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q017	How should an instructor respond when a participant answers incorrectly about maintenance?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q018	Which statement best fits the administrator scope for housekeeping?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q019	What should happen before completion credit is issued for drill?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Managing the Physical Environment.
RCFE-CETP-007_Q020	Why is a fictional scenario appropriate for practicing after-action report?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Managing the Physical Environment.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates

remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.
- ? Scenario submission and rubric or completion status.
- ? Course evaluation response export.
- ? Certificate gate audit showing approval metadata was available before issuance.

Instructor/Admin Notes

- ? Instructor: Vanessa Valerio, RN 788389. Source-backed in the master RCFE LIC 9140 transfer worksheets and instructor evidence index; evidence attachment/currentness remains final verification.
- ? Moodle builder should not enter a CDSS vendor number, course number, or approval date until issued.
- ? Reviewer login credentials, live-stream schedule, course fee, and final offering dates remain final verification items.

Compliance Guardrails

- ? Do not claim CDSS/ACS approval until issued.
- ? Do not alter official LIC forms from this content folder.
- ? Do not use real resident, staff, facility, medication, or protected information in learner submissions.
- ? Do not represent this course as part of the future 40-hour / 12-module RCFE concept.
- ? Keep all learner-facing pages labeled Draft / Pending CDSS/ACS Approval until approval metadata is entered.

RCFE-CETP-008 - Staff Supervision and Administrator Accountability

Field	Moodle-ready value
Course ID	RCFE-CETP-008
Course title	Staff Supervision and Administrator Accountability
Filed source title	Staff Supervision, Training Records, and Administrator Accountability
Filed course hours	2
CDSS/RCFE core knowledge category	Management/Supervision of Staff
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course focuses on administrator responsibilities for staff supervision, role clarity, onboarding, training records, day/night coverage communication, performance follow-up, and documentation of corrective coaching.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify staff supervision controls that support resident care and regulatory readiness.
- ? Explain how training records, duty assignments, and communication tools support accountability.
- ? Apply a coaching and documentation approach to staff performance scenarios.

Page: Lesson Content

Hour 1: Supervision framework, role clarity, staffing patterns, and training

Learners connect staff qualifications, role assignments, shift coverage, day/night communication, and training records to resident safety and regulatory readiness.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Performance coaching, documentation, personnel controls, and accountability

Learners practice correcting a performance issue with specific expectations, respectful coaching, documented follow-up, and escalation when resident safety or compliance may be affected.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Supervision framework, role clarity, staffing patterns, and training	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Performance coaching, documentation, personnel controls, and accountability	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A caregiver repeatedly misses documentation at shift change, and the night shift reports that role assignments are unclear when two residents need assistance at the same time.

Administrator activity: Create a supervisory coaching note and accountability plan with observation, expected standard, training or staffing control, follow-up date, and escalation threshold.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

- ? Choice poll: choose the best supervision control for a staffing gap.
- ? Forum prompt: rewrite vague coaching into objective expectations.
- ? Feedback checklist: identify missing elements in a training record.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 20 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-008_Q001	Which administrator action best supports staff supervision in RCFE-CETP-008?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q002	A learner sees a scenario involving role clarity. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q003	Which documentation entry is most defensible for training record?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q004	When shift handoff raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q005	Which choice would create the greatest compliance risk for staffing pattern?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q006	What evidence should Moodle retain for an activity about performance coaching?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q007	How should an instructor respond when a participant answers incorrectly about corrective documentation?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q008	Which statement best fits the administrator scope for personnel file?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q009	What should happen before completion credit is issued for administrator accountability?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Management/Supervision of Staff.

Question name	Question text	Correct	Rationale
RCFE-CETP-008_Q010	Why is a fictional scenario appropriate for practicing escalation?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q011	Which administrator action best supports staff supervision in RCFE-CETP-008?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q012	A learner sees a scenario involving role clarity. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q013	Which documentation entry is most defensible for training record?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q014	When shift handoff raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q015	Which choice would create the greatest compliance risk for staffing pattern?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q016	What evidence should Moodle retain for an activity about performance coaching?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q017	How should an instructor respond when a participant answers incorrectly about corrective documentation?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q018	Which statement best fits the administrator scope for personnel file?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Management/Supervision of Staff.
RCFE-CETP-008_Q019	What should happen before completion credit is issued for administrator accountability?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Management/Supervision of Staff.

Question name	Question text	Correct	Rationale
RCFE-CETP-008_Q020	Why is a fictional scenario appropriate for practicing escalation?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Management/Supervision of Staff.

Feedback: Course Evaluation

Learners complete a Moodle Feedback activity rating objective clarity, relevance to RCFE administrator duties, instructor effectiveness, materials, technology, pacing, scenario usefulness, assessment fairness, accessibility, and suggested improvements.

Completion Gate: Required Completion

Completion is blocked until the learner completes the full approved duration, required lesson pages, scenario application, active participation checks, post-test pass, evaluation if required, and approval/vendor/course metadata check. Certificates remain disabled while approval is pending.

Evidence Generated by Moodle

- ? Activity completion report with page, H5P/Lesson, Forum/Choice/Feedback, Quiz, and Evaluation status.
- ? Attendance and engagement logs for live-stream delivery.
- ? Quiz grade, attempt history, timestamps, item responses, and pass/fail status.

RCFE-CETP-009 - RCFE Business Operations and Claim-Safe Communication

Field	Moodle-ready value
Course ID	RCFE-CETP-009
Course title	RCFE Business Operations and Claim-Safe Communication

Field	Moodle-ready value
Filed source title	RCFE Business Operations, Records, and Claim-Safe Communications
Filed course hours	2
CDSS/RCFE core knowledge category	Business Operations
Provider/vendor	CI Institute of Nursing, Inc.
Instructor of record	Vanessa Valerio, RN 788389
Approval status	Draft / Pending CDSS/ACS Approval

Page: Course Overview

This course addresses business-operation controls relevant to RCFE administrators, including records, fiscal and operational documentation, audit readiness, public-facing communication, and claim-safe management practices.

This Moodle course is built as one filed LIC 9140 course. It is not a module inside the future 40-hour / 12-module concept. It must remain labeled Draft / Pending CDSS/ACS Approval until official approval metadata is available.

Learning objectives:

- ? Identify RCFE business-operation records and controls that support compliant management.
- ? Distinguish operational communication from public claims that require approval confirmation.
- ? Apply an audit-readiness checklist to business records, training records, and public-facing statements.

Page: Lesson Content

Hour 1: Business-operation controls, records, fiscal documentation, and audit readiness

Learners review record ownership, document libraries, fiscal and operational files, plan-of-operation awareness, retention controls, and readiness for monitoring or submission review.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour 2: Claim-safe communications, approval-number controls, and scenario review

Learners identify language that could imply CDSS/ACS approval, guaranteed outcomes, or unavailable services. The lesson teaches conservative public language until vendor and course approval metadata is issued and verified.

Learner application: pause after the page content and identify the specific administrator decision, the record that should be created or updated, and the escalation point if the issue cannot be resolved through routine procedure.

Hour-by-Hour Course Structure

Hour	Moodle activity	Learner work	Evidence generated
1	Page + H5P/Lesson + participation prompt	Business-operation controls, records, fiscal documentation, and audit readiness	Page view, activity completion, response/submission timestamp
2	Page + H5P/Lesson + participation prompt	Claim-safe communications, approval-number controls, and scenario review	Page view, activity completion, response/submission timestamp

H5P/Lesson: Scenario Application

Scenario: A draft website page says the vendor is CDSS-approved and lists a course number before approval has been issued. The same folder lacks a clear owner for several required records.

Administrator activity: Rewrite the public-facing language and build a business-record action list with owner, status, approval dependency, record location, and final clearance step.

Builder instructions: configure this as a Moodle Lesson or H5P Branching Scenario with required completion. Learners must choose an action, receive corrective feedback for unsafe choices, and submit the final documentation product through Assignment or online text.

Forum/Choice/Feedback: Participation Check

? Choice poll: identify the unsafe public claim.

? Forum prompt: rewrite a marketing sentence in pending-approval language.

? Feedback checklist: classify records as ready, pending, or approval-dependent.

Participation completion rule: all listed participation checks must be completed. In live-stream delivery, attendance and engagement prompts must be captured at opening, closing, and at least every 20 to 30 minutes.

Quiz: Knowledge Check/Post-Test

Post-test minimum for this filed course: 20 questions. Passing score: 80 percent. Attempts: configure according to approved remediation policy; no certificate until passed.

Question name	Question text	Correct	Rationale
RCFE-CETP-009_Q001	Which administrator action best supports business operations in RCFE-CETP-009?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Business Operations.
RCFE-CETP-009_Q002	A learner sees a scenario involving audit readiness. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Business Operations.
RCFE-CETP-009_Q003	Which documentation entry is most defensible for record owner?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Business Operations.
RCFE-CETP-009_Q004	When retention raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Business Operations.
RCFE-CETP-009_Q005	Which choice would create the greatest compliance risk for public claim?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Business Operations.
RCFE-CETP-009_Q006	What evidence should Moodle retain for an activity about approval metadata?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Business Operations.

Question name	Question text	Correct	Rationale
RCFE-CETP-009_Q007	How should an instructor respond when a participant answers incorrectly about vendor number?	A	Active learning requires feedback that corrects misunderstanding and preserves assessment integrity. Course focus: Business Operations.
RCFE-CETP-009_Q008	Which statement best fits the administrator scope for course number?	A	The RCFE administrator scope is operational oversight and escalation, not overclaiming or unsourced practice. Course focus: Business Operations.
RCFE-CETP-009_Q009	What should happen before completion credit is issued for claim-safe communication?	A	Completion and certificate release require all required gates and approval metadata. Course focus: Business Operations.
RCFE-CETP-009_Q010	Why is a fictional scenario appropriate for practicing document library?	A	Fictional scenarios support application practice while protecting privacy and avoiding false approval claims. Course focus: Business Operations.
RCFE-CETP-009_Q011	Which administrator action best supports business operations in RCFE-CETP-009?	A	The administrator's role is to use approved controls, create objective evidence, and escalate unresolved risk. Course focus: Business Operations.
RCFE-CETP-009_Q012	A learner sees a scenario involving audit readiness. What is the safest first step?	A	Source-checking and policy confirmation prevent inaccurate action and premature claims. Course focus: Business Operations.
RCFE-CETP-009_Q013	Which documentation entry is most defensible for record owner?	A	Objective documentation supports continuity, supervision, and regulatory review. Course focus: Business Operations.
RCFE-CETP-009_Q014	When retention raises uncertainty, what should the administrator do?	A	Uncertain regulatory or operational questions should be escalated and tracked rather than guessed. Course focus: Business Operations.
RCFE-CETP-009_Q015	Which choice would create the greatest compliance risk for public claim?	A	Premature claims and guarantees can mislead learners, residents, families, or regulators. Course focus: Business Operations.
RCFE-CETP-009_Q016	What evidence should Moodle retain for an activity about approval metadata?	A	Moodle evidence must substantiate duration, participation, assessment, and completion decisions. Course focus: Business Operations.
