

Yadvir Submission Guide

CI Institute of Nursing | Google Drive end-user packet

Start here before opening application folders.

Working packet rule

- Use each lane's compiled signer-review binder and official forms as the working packet.
- Use each lane's compiled course materials for quick reviewer access to the course content.
- Use each lane's Moodle LMS reference folder only as implementation/reference support.
- Do not use files in `99_NOT_FOR_SUBMISSION_REFERENCE` for submission.

Do not submit

- Raw source folders
- Build scripts
- Generated fragments
- Old individual module PDFs
- Reference-only exclusions

Approval status

Government approval is still pending across all lanes. No course should be advertised as approved until the applicable agency approval is issued.

Final remaining items are human/regulator items only

- Final signatures, initials, and dates
- Final payment/check insertion where required
- Final reviewer access verification where required
- Final legal/privacy signoff where required
- Vanessa evidence attachment verification
- Agency approval / issued number(s)

Vanessa Evidence Verification Checklist

1. Already provided in source — verify and attach

- Resume/CV or professional experience documentation already present in source-backed evidence folders
- RN license / license number 788389 where source-backed
- Instructor / SME source references already used in the packet
- Source-backed instructor evidence indexes already in the master packet

Mark these as: **Provided in source — Yadvir to verify currentness, completeness, and correct attachment before submission.**

2. Needs Vanessa confirmation only if outdated/missing

- Confirm RN license is current at time of submission
- Confirm CV/resume is current enough for submission
- Confirm any required attestation/signature fields are complete if the agency requires them

3. Final signer/submission verification

- Verify the evidence packet is attached in the correct lane
- Verify attachment readability/completeness
- Verify final signer packet, forms, and checklists all align with the same instructor identity

This PDF is a styled reviewer-facing reference document. Official government forms remain unbranded.
