Question

Answer key

1

What is the first operational question when a resident with dementia becomes distressed?

What unmet need, trigger, pain, fear, or environmental factor may be contributing?

2

Why should dementia interventions be

documented?

**Documentation supports continuity,
supervision, accountability, and regulatory
review.**

3

**Which approach best aligns with
person-centered care?**

**Adapting communication and environment to
the resident's history, abilities, and needs.**

4

**What should staff do when dementia-related
behavior creates immediate safety risk?**

**Follow the approved safety protocol and
escalate according to facility policy.**

5

Which Core category applies?

**Managing Alzheimer's Disease and Related
Dementias.**

Active Participation Verification Method

Live-stream attendance is verified through platform log-in records, attendance check at opening and closing, periodic polls or chat/verbal responses at least every 20 to 30 minutes, facilitator monitoring, and post-test completion. A participant who is absent, inactive, or disconnected for a material portion of the approved hours is not issued completion credit until the deficiency is resolved under an approved make-up approach.
