BRN Case Management CE Package - Draft / Pending BRN CEP Approval

BRN Care Manager / RN Case Management CEP | Draft / Pending BRN CEP Approval

BRN Case Management CE Package - Draft / Pending BRN CEP Approval

Foundations of RN Case Management and Nursing Scope

Provider (from master packet): CI Institute of Nursing, Inc. - 419 E. Hamilton Ave., Campbell, CA 95008 - 650-449-6706 - humanresources@ci-ion.com - <https://www.ci-ion.com>

"Pending California Board of Registered Nursing Continuing Education Provider approval. Do not advertise, issue certificates, or represent this course as approved until a BRN CEP number has been issued."

This document follows a CCCCCO-style documentation organization only (structured overview, objectives, content outline, activities, facilitator notes, assessment mapping, compliance support). No CCCCCO content is copied; all content is original and customized for California BRN Case Management CE.

Module At a Glance

Field	Value
Module ID	CM-M01
Module title	Foundations of RN Case Management and Nursing Scope
Parent course	RN Case Management in Home Health: Care Coordination, Documentation, Patient Advocacy, and Safe Transitions of Care
Contact hours	3 (draft design math)
Estimated learner minutes	165 (>=150 floor)
Direct/indirect linkage	Indirect patient/client care
Approval status	Draft / Pending BRN CEP Approval

BRN Relevance Rationale

Establishes the RN scope-of-practice and role boundaries that make nurse-led case management safe and lawful, framing case management as a function within registered-nursing practice rather than a separate license.

Module Description

Orients the RN to the definition, purpose, and process of nurse-led case management; differentiates it from social work and unlicensed coordination; and fixes the scope boundaries and escalation duties that govern every later module.

Measurable Learning Objectives

By the end of this module the learner will be able to:

- 1 Define RN case management and distinguish it from social work and unlicensed care coordination using BRN scope language.
- 2 Identify three RN scope-of-practice boundaries that constrain case-management decisions.
- 3 Describe how care coordination qualifies as direct/indirect patient care under nursing practice.
- 4 Recognize when a case-management task must be escalated to a licensed prescriber or RN supervisor.

Required Readings / Learning Content Sections

- Reading 1.1 - Definition and purpose of RN case management.
- Reading 1.2 - California RN scope of practice and legal boundaries (overview; not legal advice).
- Reading 1.3 - Care-team roles: RN vs. social worker vs. unlicensed staff.
- Reading 1.4 - The case-management process model and escalation duties.

Detailed Lesson Outline

Lesson ID	Lesson	Est. minutes
CM-M01-L1	What RN case management is (and is not)	35
CM-M01-L2	Nursing scope of practice and legal boundaries	40
CM-M01-L3	Roles on the care team; RN vs. SW vs. unlicensed staff	35
CM-M01-L4	The case-management process model (screen-assess-plan-coordinate-monitor-evaluate)	35
CM-M01-KC	Knowledge check + scope/escalation note	20

Total estimated instructional minutes: **165** (meets the ≥ 150 -minute / 3-contact-hour floor).

Key Terms

Term	Definition
Case management	A collaborative process of assessment, planning, coordination, and monitoring of services to meet a patient's health needs.
Scope of practice	The activities a licensed RN is authorized to perform under state law and competency.
Escalation	Routing a decision or task to a prescriber/RN supervisor when it exceeds the case manager's role.
Indirect patient care	Nursing activities that support patient outcomes without hands-on care (e.g., coordination, documentation).
Care coordination	Organizing patient care activities and sharing information among participants to achieve safer, more effective care.

Fictional / De-identified Case Scenario

All clinical content is fictional and de-identified. No PHI. Nurse R receives a home-health referral for a fictional 72-year-old client recovering from a hip procedure. The referral asks Nurse R to 'adjust the pain medication.' No prescriber order accompanies the request.

Learner Activities

- Read Sections 1.1-1.4.
- Complete the team-role matching exercise (RN vs. SW vs. unlicensed).
- Work the fictional referral scenario and choose the correct first action.

- Complete Knowledge Check 1.

Documentation / Decision-Making Exercise

Write a 5-line scope-and-escalation note documenting why the requested medication change is outside RN case-management scope, what you did instead, and to whom the request was routed.

Knowledge Check Blueprint

8 items (MCQ + true/false), unlimited attempts, immediate per-item feedback, no full answer key shown, $\geq 80\%$ to complete.

Assessment Items (Learner-Facing Stems)

KC1-Q1 (MCQ). A home-health referral asks the RN case manager to 'adjust the pain medication.' What is the correct first action?

- A) Adjust the dose yourself
- B) Decline and route to the prescriber/RN supervisor
- C) Ask the family to decide
- D) Ignore the referral

KC1-Q2 (True/False). Care coordination performed by an RN can qualify as indirect patient care under nursing practice.

- True
- False

KC1-Q3 (MCQ). Which task is clearly within the RN case manager's role?

- A) Diagnosing a new condition
- B) Prescribing medication
- C) Coordinating services and monitoring the care plan
- D) Performing surgery

LMS Completion Criteria

- All lesson pages viewed (activity completion: require view).
- CM-M01 knowledge check passed at $\geq 80\%$ (require passing grade).
- Documentation/decision exercise submitted (require submission).

Evidence Generated by Learner Completion

- Activity-completion timestamps (time-on-task evidence).
- Knowledge-check score and attempt log.
- Submitted exercise artifact (retained ≥ 4 years; no PHI).

Moodle Activity Recommendations

- Page (overview)
- Book (lessons)
- Quiz (KC1)
- Assignment (scope note)

- Label (checkpoint)

Accessibility Considerations

- Captions + transcripts for any media; semantic headings; alt text on diagrams.
- Sufficient color contrast; no color-only meaning; keyboard-navigable activities.
- Accessible downloadable templates (tagged PDF + DOCX); extended-time accommodation supported.
- Target WCAG 2.1 AA on the built course.

PHI / Privacy Guardrails

- All cases fictional and de-identified; no real patient/resident/family/facility data.
- Ensure no statement reads as legal advice; mark scope content as educational overview.
- Submission reminders and (for capstone) attestation + manual PHI review.

SME Review Flags

- [[SME REVIEW REQUIRED]] Confirm BRN/California RN scope phrasing with RN SME (Vanessa Valerio).

Compliance Review Flags

- [[COMPLIANCE REVIEW]] Ensure no statement reads as legal advice; mark scope content as educational overview.

Internal Answer Key Appendix (ADMIN / FACULTY ONLY - DO NOT SHOW LEARNERS)

Item ID	Type	Correct answer	Rationale	Remediation
KC1-Q1	MCQ	B	Medication changes require a prescriber order and are outside RN case-management scope; route appropriately.	Review Reading 1.2 (scope boundaries) and CM-M01-L2.
KC1-Q2	True/False	True	Coordination that supports patient outcomes is recognized indirect patient care when tied to nursing practice.	Review Reading 1.1 and the BRN fit rationale.
KC1-Q3	MCQ	C	Coordination and monitoring are core case-management functions; the others require different authority.	Review CM-M01-L4 (process model).

Debrief / Remediation Guidance

Debrief the scenario by contrasting scope-compliant routing with common pitfalls (acting without an order, deferring clinical decisions to family). After a failed knowledge check, route the learner to Reading 1.2 and require one retry.

Application-Packet Defensibility Notes

Anchors the entire course in registered-nursing scope, supporting the BRN requirement that content be relevant to the practice of registered nursing.

Program-structure note: This module is part of the 30-contact-hour, 10-module RN case management program (10 modules x 3 contact hours; 50 instructional minutes = 1 contact hour; minimum 1,500 instructional minutes, 1,680 design minutes). The official BRN contact-hour map and transfer worksheet are aligned to this 30-contact-hour structure. Any earlier 4-contact-hour representative course is superseded and is not part of the current BRN CEP signer-review package. [[SME REVIEW REQUIRED BEFORE SUBMISSION]]

Do not advertise, issue certificates, or represent this course as BRN-approved until the official BRN CEP approval and provider number are issued.
