

Moodle Self-Host Implementation Requirements

Only

Draft / Pending Agency Approval

Signer Review

SME Hold

Agency Approval Pending

LMS development remains held until approved SME review and applicable agency metadata are complete.

Drive Scope

This folder intentionally contains only this requirements PDF and one checklist spreadsheet. The full Moodle source implementation folder remains in the repository outside the clean Google Drive upload packet.

LMS development may not start until Vanessa Valerio, RN or another approved SME has reviewed and approved the course materials. Internal SME approval is required before Aldrin/Dagny begin Moodle course-shell build, content import, quiz import, learner-access configuration, certificate setup, or production implementation. SME approval does not replace agency approval.

Source Content: 00_EXECUTIVE_SUMMARY.md

00 - Executive Summary: Self-Hosted Moodle Implementation MVP

Applicant: CI Institute of Nursing, Inc. Prepared: June 09, 2026 Status: Draft / Pending Approval (all three lanes). This package is an implementation requirement set for a self-hosted Moodle MVP. It is not a regulator submission and makes no approval claim.

Purpose of the Moodle MVP

Provide a complete, survey-defensible, self-hosted Moodle implementation requirement package so a Moodle administrator can build the learning environment for CI Institute of Nursing's current continuing-education application packet without guessing course names, categories, sections, activities, completion settings, restrict-access rules, quiz banks, passing scores, evidence reports, roles, review workflow, certificate controls, or backup/export requirements.

This package follows the controlling master application packet (see FINAL_SUBMISSION_REVIEW_PACKAGE/00_MASTER_SUBMISSION_REVIEW_INDEX.md and 00_FINAL_COURSE_ALIGNMENT_AUDIT.md). Where a required Moodle implementation artifact was missing, it has been generated conservatively and clearly labeled "Generated Moodle MVP implementation artifact," with SME/admin review flags where content judgment is involved.

Three lanes supported

1. CNA / CDPH CE - 12 units x 2 online CE hours = 24 online CE hours. Year 1 = U01-U06 (12 hrs); Year 2 = U07-U12 (12 hrs). Source backbone = CCCCCO/NATP Modules 10-17. Online CE only; no clinical hours; no hands-on competency validation; no full 48-hour renewal claim. Draft / Pending Approval.
2. RCFE / CDSS CETP - filed packet = 9 LIC 9140 courses / 27 hours (RCFE-CETP-001 through 009). The 40-hour / 12-module program is listed only as a future, non-submitted expansion. Draft / Pending Approval.
3. BRN / CEP RN Case Management - 30 contact hours = 10 modules x 3 contact hours; 50 instructional minutes minimum per contact hour; 30 contact hours = at least 1,500 instructional minutes. Provider-approval framing (not course-by-course). Contact hours, not CEUs. Pending BRN CEP approval. No certification or scope-expansion claim. No obsolete four-hour BRN wording.

What the MVP proves

- ? The course architecture for all three lanes can be built in Moodle exactly as filed/controlling.
- ? Completion gating, sequential progression, and assessment pass thresholds can be enforced.
- ? Seat-time / contact-hour evidence, completion evidence, grades, attempts, and logs can be captured and exported for survey review.
- ? Read-only external reviewer access can be provisioned without edit rights.
- ? Certificates can be hard-blocked until regulator approval and released only under documented approval metadata.

What the MVP does NOT prove

- ? It does not prove or assert any regulator approval. All lanes are Draft / Pending Approval.
- ? CNA: it does not, by itself, complete all California CNA renewal requirements; it is online CE only with no clinical hours and no hands-on competency validation.
- ? BRN: it makes no certification claim and no scope-of-practice expansion claim; CE is measured in contact hours, not CEUs.

? RCFE: the controlling structure is the filed 9-course / 27-hour packet; the 40-hour / 12-module concept is future expansion only and is not the current submission.

Pending-approval posture

Every learner-facing course, certificate control, and catalog statement is built in a "Pending Approval" posture. No approval numbers are invented. Where an approval number, signature, payment, reviewer credential, or regulator decision is required, the package creates a safe required field / gate / checklist item rather than fabricating data (see 98_MISSING_OR_HUMAN_VERIFICATION_ITEMS.md).

No certificate issuance before approval

Certificate activities are disabled before approval. An optional internal test certificate may exist only if watermarked "NOT VALID FOR CE CREDIT." Certificate release is gated behind approval metadata and an authorized role (see 06_CERTIFICATE_AND_APPROVAL_CONTROLS.md).

Survey-readiness posture

The build is designed to be defensible during a survey/audit: completion evidence is mapped per unit/course/module, retake history is retained, failed attempts block completion, reports/exports are defined, no PHI is permitted, and no false approval claims appear. See 08_SURVEY_READINESS_QA_TEST_PLAN.md and 15_REVIEWER_ACCESS_AND_SURVEY_WORKFLOW.md.

Go / No-Go criteria (summary)

GO to build the MVP environment: all implementation artifacts in this package are present (validated). The MVP build can proceed in a non-production / pre-approval posture.

NO-GO to issue certificates or make public approval claims until: (1) regulator approval is granted and approval metadata is entered; (2) legal/privacy signoff is recorded; (3) SME quiz review is complete; (4) certificate wording is confirmed; (5) reviewer access and report/backup exports are tested. See 19_GO_LIVE_HOLD_AND_RELEASE_CRITERIA.md and 20_POST_APPROVAL_ACTIVATION_PLAN.md.

Moodle version recommendation (summary)

Default recommendation: Moodle 4.5 LTS for survey-stable self-hosting and plugin compatibility. Moodle 5.2 may be considered only if all required plugins, import tools, and themes are verified compatible. Version recommendation requires final technical verification before production install. See 01_SELF_HOSTED_MOODLE_REQUIREMENTS.md.

Quiz banks generated: CNA 170, RCFE 135, BRN 150 (total 455), each in GIFT + CSV + Markdown, with coverage audit confirming minimums.

Source Content:

01_SELF_HOSTED_MOODLE_REQUIREMENTS.md

01 - Self-Hosted Moodle Requirements

Status: Draft / Pending Approval. Generated Moodle MVP implementation artifact where source technical values were not available locally. Items marked "Technical admin final verification required" must be confirmed by the technical administrator before production install.

Moodle version recommendation

- ? Default recommendation: Moodle 4.5 LTS for survey-stable self-hosting and plugin compatibility (long-term support release lifecycle reduces forced upgrades during a survey window).
- ? Moodle 5.2 may be considered only if all required plugins, import tools (GIFT/CSV question import), themes, and the certificate plugin are verified compatible.
- ? Version recommendation requires final technical verification before production install. Do not make unsupported version/security-support claims unless verified from current Moodle documentation.
- ? Action: Technical admin final verification required - confirm the exact current LTS version and its supported PHP/database matrix from current official Moodle documentation at install time.

Web server requirement

- ? A supported web server (e.g., Apache or Nginx) configured for the chosen Moodle version.
- ? HTTPS enforced (see below).
- ? Technical admin final verification required - confirm exact web server version against the Moodle release's requirements.

PHP / database requirement

- ? PHP version and required PHP extensions as specified for the chosen Moodle release.
- ? A supported database engine (e.g., MariaDB/MySQL or PostgreSQL) at a version supported by the chosen Moodle release.
- ? Do not hard-code specific version numbers here that are not verified. Technical admin final verification required - confirm PHP version, extensions, and database engine/version from the chosen release's official requirements page.

HTTPS / domain requirement

- ? A dedicated domain or subdomain for the LMS.
- ? Valid TLS certificate; force HTTPS site-wide; set wwwroot to the https URL.
- ? Technical admin final verification required - domain ownership and certificate issuance.

SMTP / email requirement

- ? Working outbound email (SMTP) for account creation, password reset, and notifications.
- ? A monitored no-reply/support mailbox.
- ? Technical admin final verification required - SMTP host/credentials.

Cron requirement

- ? Moodle cron must run on a reliable schedule (e.g., every 1 minute) for completion processing, notifications, scheduled tasks, and backups.
- ? Technical admin final verification required - cron configured and monitored.

Backups

- ? Automated scheduled backups of the database and moodledata, plus Moodle automated course backups (.mbz).
- ? Offsite/secondary copy. See 14_DATA_RETENTION_BACKUP_AND_SECURITY_SPEC.md.

Logging

- ? Standard Moodle logging enabled; logs retained per retention policy; log export available for survey/audit (see 13_REPORTING_AND_AUDIT_EXPORT_SPEC.md).

Storage

- ? Adequate disk for moodledata, database, and backups, with growth headroom.
- ? Technical admin final verification required - sizing based on expected enrollment and media.

Authentication

- ? Manual accounts and/or email-based self-registration controlled by admin policy.
- ? Strong password policy; reviewer accounts use temporary credentials with forced reset (see 04_ROLE_ACCESS_AND_WORKFLOW_MATRIX.md and 15_REVIEWER_ACCESS_AND_SURVEY_WORKFLOW.md).
- ? Multi-factor authentication for privileged accounts where supported. Technical admin final verification required.

Roles

- ? Use the role set defined in 04_ROLE_ACCESS_AND_WORKFLOW_MATRIX.md and import_assets/ROLE_MATRIX_IMPORT_REFERENCE.csv, including a custom read-only External Survey Reviewer role.

Permissions

- ? Least-privilege configuration. Only Site Administrator / Manager may change site configuration, enable certificates, or perform documented grade overrides.

Plugin policy

- ? Minimize plugins. Permitted/expected: a certificate plugin (e.g., a maintained Custom Certificate plugin) kept DISABLED until approval; optionally a configurable reports plugin.
- ? Only install plugins verified compatible with the chosen Moodle version and from trusted sources. Technical admin final verification required for each plugin.

Theme / branding

- ? A maintained, accessible theme; CI Institute of Nursing branding applied conservatively.
- ? No approval-claim language in branding before approval. See 17_ACCESSIBILITY_AND_MOBILE_REQUIREMENTS.md.

Accessibility

- ? WCAG-oriented configuration (headings, alt text, contrast, captions/transcripts). See 17_ACCESSIBILITY_AND_MOBILE_REQUIREMENTS.md.

No-PHI controls

? Learner warnings, activity prompt rules, and a quarantine/deletion process for any PHI accidentally entered. Fictional, de-identified scenarios only. See 16_NO_PHI_AND_PRIVACY_CONTROLS.md.

Privacy / security hardening

? Force HTTPS; secure cookies; disable unused features; restrict admin to dedicated accounts; keep Moodle and server patched.

? Configure Moodle privacy/GDPR-style tools and a privacy policy page. Technical admin final verification required - jurisdiction-specific privacy requirements.

Retention / export

? Define retention for completion evidence and learner records aligned with each lane's recordkeeping requirements (see 14_DATA_RETENTION_BACKUP_AND_SECURITY_SPEC.md). Exact retention periods: SME/legal verification required.

Disaster recovery

? Documented restore procedure; periodic restore test (see 08_SURVEY_READINESS_QA_TEST_PLAN.md, test BR-01). Technical admin final verification required - DR runbook.

Admin ownership

? A named Site Administrator/Manager owns the environment, configuration, and approvals. (Named human owner assignment: final human verification required - do not fabricate a person.)

Reviewer account controls

? External Survey Reviewer accounts are read-only, time-limited, forced to reset password on first login, scoped to assigned categories/courses, and deactivated/expired after the survey window. See 15_REVIEWER_ACCESS_AND_SURVEY_WORKFLOW.md.

Evidence retention

? Retain completion reports, grade reports, quiz attempts (including failed attempts), logs, certificate issuance logs (post-approval), and course backups in a secure evidence archive for the required retention period (SME/legal verification required for exact periods).

Source Content: 02_COURSE_ARCHITECTURE_BLUEPRINT.md

02 - Course Architecture Blueprint (All Three Lanes)

Status: Draft / Pending Approval. Controlling source: master application packet (00_FINAL_COURSE_ALIGNMENT_AUDIT.md).

Recommended Moodle category structure:

- ? CI - CNA - CE (CNA / CDPH CE)
- ? CI - RCFE - CETP (RCFE / CDSS CETP)
- ? CI - BRN - CM (BRN / CEP RN Case Management)

Use the Topics format with one section per unit/module/course as described below. Turn on "Enable completion tracking" at site and course level. Set restrict-access dependencies per `import_assets/RESTRICT_ACCESS_RULES_REFERENCE.csv`.

CNA / CDPH CE - one Moodle course recommended for the MVP

- ? Course short name: CNA - CE - 24; full name: "CI Institute of Nursing - CNA Continuing Education (12 Units / 24 Online CE Hours) [Draft / Pending Approval]".
- ? 12 units U01-U12; each unit = 2 online CE hours (total 24).
- ? Section groups: "Year 1 (U01-U06, 12 hours)" and "Year 2 (U07-U12, 12 hours)" - implemented as labeled section dividers or two section ranges.
- ? Online CE only; no clinical hours; no hands-on competency validation.

Per-unit activity pattern (sequential, completion-gated):

1. Overview page
2. Objectives page
3. Lesson/Resource (content)
4. Interaction/checkpoint
5. Quiz (unit quiz bank)
6. Scenario/documentation activity
7. Attestation
8. Completion gate (unit complete when all above complete and quiz passed)

Plus a comprehensive Final Assessment gated behind all 12 units.

Source module mapping (backbone, CCCCCO/NATP Modules 10-17):

- ? U01, U02 -> Module 10 (Vital Signs)
- ? U03 -> Module 11 (Nutrition)
- ? U04 -> Module 12 (Emergency Procedures)
- ? U05, U06 -> Module 13 (Long Term Care Patient/Resident)
- ? U07 -> Module 14 (Rehabilitative Nursing)

? U08, U09 -> Module 15 (Observation and Charting)

? U10 -> Module 16 (Death and Dying)

? U11, U12 -> Module 17 (Patient/Resident Abuse)

Detailed shell spec: `course_shells/CNA_COURSE_SHELL_BUILD_SPEC.md`.

RCFE / CDSS CETP - 9 separate Moodle courses (filed LIC 9140 list)

Nine courses matching the filed LIC 9140 set (no 40-hour substitution):

? RCFE-CETP-001 - Laws, Regulations, Policies, and Procedural Standards (4h)

? RCFE-CETP-002 - Alzheimer's/Dementia: Person-Centered Care Foundations (4h)

? RCFE-CETP-003 - Alzheimer's/Dementia: Safety, Environment, and Documentation (4h)

? RCFE-CETP-004 - Resident Rights, Dignity, Councils, and Abuse Prevention (2h)

? RCFE-CETP-005 - Medication Management in RCFE Operations (4h)

? RCFE-CETP-006 - Admission, Retention, Reappraisal, and Needs and Services Plans (3h)

? RCFE-CETP-007 - Emergency Procedures and Physical Environment Controls (2h)

? RCFE-CETP-008 - Staff Supervision, Training Records, and Administrator Accountability (2h)

? RCFE-CETP-009 - Business Operations, Records, and Claim-Safe Communications (2h)

Total = 27 hours. Dementia-specific coverage is concentrated in RCFE-CETP-002 and RCFE-CETP-003.

Per-course activity pattern (sequential, completion-gated):

1. Overview
2. Objectives
3. Timed content sections
4. Interaction/checkpoint
5. Scenario/admin judgment exercise
6. Quiz/final assessment
7. Evaluation (participant course evaluation)
8. Attestation
9. Completion evidence (course completion)

Note: The 40-hour / 12-module RCFE Administrator Renewal program is FUTURE EXPANSION ONLY and is NOT part of this submission or controlling structure. Do not build it as the current structure.

Detailed shell spec: `course_shells/RCFE_COURSE_SHELL_BUILD_SPEC.md`.

BRN / CEP RN Case Management - one 30-contact-hour Moodle course recommended for the MVP

? Course short name: BRN-CM-30; full name: "RN Case Management in Home Health - 30 Contact Hours (10 Modules) [Pending BRN CEP Approval]".

? 10 modules x 3 contact hours = 30 contact hours.

? 50 instructional minutes minimum per contact hour; 30 contact hours = at least 1,500 instructional minutes (design target ~1,680 minutes).

? Contact hours, not CEUs. Provider (CEP) approval framing. No certification or scope-expansion claim.

Modules:

- ? M01 Foundations of RN Case Management and Nursing Scope
- ? M02 Assessment, Intake, and Patient-Centered Care Planning
- ? M03 Care Coordination Across Disciplines and Settings
- ? M04 Documentation, Legal Charting, and Audit-Ready Records
- ? M05 Patient Rights, Consent, Advocacy, and Ethical Boundaries
- ? M06 Transitions of Care, Discharge Planning, and Community Resources
- ? M07 Utilization Review, Medical Necessity, and Payer-Safe Communication
- ? M08 Quality Assurance, Risk Management, Incident Reporting, and Escalation
- ? M09 Chronic Disease, Geriatric, and High-Risk Patient Management
- ? M10 Integrated Case Management Capstone

Per-module activity pattern (sequential, completion-gated):

1. Objectives
2. Timed content (≥ 150 instructional minutes per 3-contact-hour module target)
3. Case scenario
4. Documentation/decision activity
5. Quiz (module quiz bank)
6. Completion evidence

Plus a Capstone/Final Assessment gate behind all 10 modules.

Detailed shell spec: `course_shells/BRN_COURSE_SHELL_BUILD_SPEC.md`.

Source Content:

04_ROLE_ACCESS_AND_WORKFLOW_MATRIX.md

04 - Role, Access, and Workflow Matrix

Status: Draft / Pending Approval. See machine-readable companion
`import_assets/ROLE_MATRIX_IMPORT_REFERENCE.csv`.

Roles and access

Site Administrator

- ? Allowed: full site configuration, plugin management, role definition, backups, all reports/grades/exports, certificate enablement (post-approval only).
- ? Prohibited: shared logins; enabling certificates before approval; undocumented grade overrides.
- ? Reports: all. Grades: all. Certificates: control (post-approval). User data: all. Export: all. Risk controls: dedicated account, MFA where supported, actions logged.

Moodle Manager

- ? Allowed: manage categories/courses, enroll users, run/export reports, document grade overrides, provision reviewer accounts.
- ? Prohibited: enabling certificates before approval; undocumented overrides.
- ? Reports: all assigned. Grades: view/edit with documentation. Certificates: control (post-approval). User data: yes. Export: yes.

Course Creator

- ? Allowed: create and build course shells and content within assigned category.
- ? Prohibited: editing learner grades; releasing certificates; site config.
- ? Reports: limited. Grades: no (default). Certificates: no. User data: no. Export: no.

Editing Teacher

- ? Allowed: build/edit course content, manage activities, grade, view course reports.
- ? Prohibited: site config; enabling certificates before approval.
- ? Reports: course-level. Grades: yes. Certificates: no. User data: limited. Export: limited.

Non-editing Teacher

- ? Allowed: view content, grade assigned activities, view course reports.
- ? Prohibited: editing content; site config.
- ? Reports: course-level. Grades: view (grade if assigned). Certificates: no. User data: limited. Export: limited.

External Survey Reviewer (custom read-only role)

- ? Allowed: read-only view of assigned categories/courses, content, completion and grade reports, exported evidence bundle.
- ? Prohibited: any edit, grade change, enrollment change, content change, certificate action, access to unrelated courses or full PII.

? Reports: read-only. Grades: read-only. Certificates: none. User data: de-identified/limited for review. Export: provided as a prepared bundle. Risk controls: temporary credential, forced password reset, time-limited, deactivated after survey window.

Read-only Compliance Reviewer (internal)

? Allowed: internal read-only review of assigned courses, reports, and evidence.

? Prohibited: edits, grade changes, certificate actions.

? Reports/Grades: read-only. Certificates: none. Export: read-only. Risk controls: documented access, scoped.

Learner (Student)

? Allowed: access enrolled course content, attempt quizzes, submit activities, view own grades/progress, download own certificate (post-approval only).

? Prohibited: viewing answer keys, others' data, or any admin function.

? Reports/Grades: own only. Certificates: own (post-approval). User data: own. Export: own certificate (post-approval).

Support/Admin Staff (custom scoped role)

? Allowed: account support, password resets, enrollment assistance, basic troubleshooting (scoped).

? Prohibited: content edits, grade edits, certificate control.

? Reports: limited. Grades: limited. Certificates: none. User data: limited to support tasks. Export: limited. Risk controls: actions logged.

Reviewer workflow (generated)

1. Account creation: Manager creates a reviewer account (manual auth) with a non-personal username pattern (e.g., surveyreviewer1).
2. Temporary password: set a strong temporary password communicated through a secure channel (no real reviewer password stored in this package - final human verification required).
3. Forced password reset: enable "force password change on next login."
4. Read-only role: assign the custom External Survey Reviewer role at the assigned category/course context only.
5. Enrollment/category access: scope to the specific lane/courses under review; no access to unrelated content.
6. Expiration/deactivation: set an enrollment/account end date aligned to the survey window; suspend or delete after.
7. Export logs: capture access logs for the reviewer account as part of evidence.
8. No edit rights: verify the role has no editing, grading, enrollment, or certificate capabilities (test RV-01 in 08_SURVEY_READINESS_QA_TEST_PLAN.md).

See 15_REVIEWER_ACCESS_AND_SURVEY_WORKFLOW.md for the full survey-day workflow and generated_missing_elements/GENERATED_SURVEY_REVIEWER_SCRIPT.md for the reviewer-facing script.

Source Content:

15_REVIEWER_ACCESS_AND_SURVEY_WORKFLOW.md

15 - Reviewer Access and Survey Workflow

Status: Draft / Pending Approval. Companion reviewer-facing script:
generated_missing_elements/GENERATED_SURVEY_REVIEWER_SCRIPT.md.

Reviewer account request

? A reviewer (regulator surveyor, internal compliance, or designated evaluator) requests access for a defined window. Manager records the request (who, scope, dates).

Account setup

? Manager creates a manual-auth account with a non-personal username (e.g., surveyreviewer1), a strong temporary password (delivered securely - not stored in this package), and "force password change on next login."

Read-only role

? Assign the custom External Survey Reviewer role (read-only) at the assigned category/course context only. The role has no edit, grade, enrollment, or certificate capabilities.

Reviewer dashboard / course list

? Provide the reviewer a simple list of the courses in scope (CNA course; the 9 RCFE courses; BRN course as applicable) with read-only access and a short orientation (the reviewer script).

Report export packet

? Provide the prepared read-only evidence bundle (see 13_REPORTING_AND_AUDIT_EXPORT_SPEC.md): completion reports, grade reports, quiz attempt summaries, structure screenshots, coverage audit, and (post-approval) certificate logs. De-identified; no PHI.

Temporary credential control

? Credentials are temporary, single-purpose, and time-boxed to the survey window. No reuse across windows.

Deactivation

? After the survey window, suspend or delete the reviewer account; revoke role assignments; record deactivation date. Capture reviewer-account access logs as evidence.

Screenshot / evidence package

? Maintain dated screenshots of: locked content before prerequisites, quiz pass/fail gating, certificate disabled pre-approval, completion/grade exports, and reviewer read-only view.

Survey day checklist

1. Confirm reviewer account active, read-only, scoped, expiring.
2. Confirm no certificate issuance and no approval-claim language.
3. Confirm structure matches: CNA 12x2=24; RCFE 9 courses/27h; BRN 10x3=30 contact hours.
4. Confirm no stale BRN 4-hour language; contact hours only.

5. Confirm no PHI in any activity/submission.
6. Have evidence bundle and QA test results ready.
7. Provide the reviewer script and answer access questions only (no edits during survey).
8. After: deactivate reviewer account; archive logs and evidence.

Source Content:

19_GO_LIVE_HOLD_AND_RELEASE_CRITERIA.md

19 - Go-Live Hold and Release Criteria

Status: Draft / Pending Approval.

Hard hold until approval

? The environment may be BUILT and internally tested, but it remains in a HARD HOLD for public/learner CE issuance until each lane's regulator approval is granted. No CE certificate is issued and no approval claim is published before approval.

Release criteria (all must be satisfied to lift the hold per lane)

1. Regulator approval granted and approval metadata entered (number, dates, approved titles/hours). Approval number/decision = regulator-issued (final human verification required).
2. Legal/privacy signoff recorded (final human verification - legal signature required).
3. SME quiz review completed and sign-off recorded; SME-flagged items resolved (import_assets/SME_REVIEW_REQUIRED_QUIZ_ITEMS.md).
4. Certificate metadata confirmed and wording matches approved terms (per lane; RCFE must match approved terms; CNA = online CE/no clinical hours; BRN = contact hours/no certification claim).
5. Reviewer account tested (read-only, scoped, expiring - test RV-01).
6. Report export tested (completion, grade, logs - tests RP-01/02/03).
7. Backup tested and restore verified (test BR-01).
8. No forbidden language present (validation scan clean): no false approval claim; no CNA clinical-hour overclaim; no BRN 4-hour/CEU stale language.
9. No stale structures (CNA 12x2=24; RCFE 9 courses/27h only; BRN 10x3=30 contact hours; 40-hour RCFE remains future-only).
10. No PHI present (test PH-02).

Decision

? Lift the hold for a lane only when that lane's criteria are all met and recorded. Otherwise remain on hold. See 20_POST_APPROVAL_ACTIVATION_PLAN.md.
