BRN Case Management CE Package - Draft / Pending BRN CEP Approval

BRN Care Manager / RN Case Management CEP | Draft / Pending BRN CEP Approval

BRN Case Management CE Package - Draft / Pending BRN CEP Approval

Assessment, Intake, and Patient-Centered Care Planning

Provider (from master packet): CI Institute of Nursing, Inc. - 419 E. Hamilton Ave., Campbell, CA 95008 - 650-449-6706 - humanresources@ci-ion.com - <https://www.ci-ion.com>

"Pending California Board of Registered Nursing Continuing Education Provider approval. Do not advertise, issue certificates, or represent this course as approved until a BRN CEP number has been issued."

This document follows a CCCCCO-style documentation organization only (structured overview, objectives, content outline, activities, facilitator notes, assessment mapping, compliance support). No CCCCCO content is copied; all content is original and customized for California BRN Case Management CE.

Module At a Glance

Field	Value
Module ID	CM-M02
Module title	Assessment, Intake, and Patient-Centered Care Planning
Parent course	RN Case Management in Home Health: Care Coordination, Documentation, Patient Advocacy, and Safe Transitions of Care
Contact hours	3 (draft design math)
Estimated learner minutes	170 (>=150 floor)
Direct/indirect linkage	Direct patient/client care
Approval status	Draft / Pending BRN CEP Approval

BRN Relevance Rationale

Nursing assessment, problem identification, and patient-centered goal setting are core RN clinical practice and the foundation of safe care plans.

Module Description

Builds skill in structured intake, distinguishing subjective/objective data, screening social determinants of health, and writing measurable, patient-centered goals while checking for implicit bias.

Measurable Learning Objectives

By the end of this module the learner will be able to:

- 1 Conduct a structured intake using a standardized nursing assessment framework.
- 2 Differentiate subjective and objective data and document each appropriately.
- 3 Write at least two measurable, patient-centered goals from assessment findings.
- 4 Identify social determinants of health and screen for implicit bias in intake judgments.

Required Readings / Learning Content Sections

- Reading 2.1 - Intake workflow and consent-to-assess.
- Reading 2.2 - Nursing assessment frameworks and SDOH screening.
- Reading 2.3 - From assessment data to nursing problems.
- Reading 2.4 - Writing measurable, patient-centered goals.

Detailed Lesson Outline

Lesson ID	Lesson	Est. minutes
CM-M02-L1	Intake workflow & consent-to-assess	35
CM-M02-L2	Nursing assessment frameworks / SDOH	40
CM-M02-L3	From data to nursing problems	35
CM-M02-L4	Writing measurable, patient-centered goals	40
CM-M02-KC	Knowledge check + care-plan worksheet	20

Total estimated instructional minutes: **170** (meets the ≥ 150 -minute / 3-contact-hour floor).

Key Terms

Term	Definition
Subjective data	Information reported by the patient (e.g., 'I feel tired').
Objective data	Measurable/observable findings (e.g., blood pressure, observed gait).
SDOH	Social determinants of health - conditions affecting health (housing, transport, income).
Patient-centered goal	A measurable outcome defined with the patient's values and priorities.
Implicit bias	Unconscious attitudes that can affect clinical judgment and equity.

Fictional / De-identified Case Scenario

All clinical content is fictional and de-identified. No PHI. A fictional new home-health client with type 2 diabetes reports difficulty attending appointments because of limited transportation and lives alone.

Learner Activities

- Read Sections 2.1-2.4.
- Sort sample data points into subjective vs. objective.
- Identify the SDOH barrier in the scenario and a nursing intervention.
- Complete the Care-Plan Worksheet and Knowledge Check 2.

Documentation / Decision-Making Exercise

Complete the Care-Plan Worksheet (template provided): list 3 nursing problems, 2 measurable patient-centered goals, 1 SDOH intervention, and a one-line implicit-bias check note.

Knowledge Check Blueprint

10 items (MCQ + multi-select, scenario-tagged), unlimited attempts, immediate feedback, no full key, $\geq 80\%$ to complete.

Assessment Items (Learner-Facing Stems)

KC2-Q1 (Multi-select). Which are examples of objective assessment data? (select all that apply)

- A) Reported pain 7/10
- B) Blood pressure reading
- C) Observed unsteady gait
- D) 'I feel tired'

KC2-Q2 (MCQ). Which is the best-written measurable, patient-centered goal?

- A) Patient will be healthier
- B) Patient will check blood glucose twice daily and log results for 2 weeks
- C) Patient will try harder
- D) Nurse will fix the diabetes

KC2-Q3 (MCQ). The transportation barrier in the scenario is best classified as:

- A) A medication error
- B) A social determinant of health
- C) Objective vital sign
- D) A billing issue

LMS Completion Criteria

- All lesson pages viewed (activity completion: require view).
- CM-M02 knowledge check passed at $\geq 80\%$ (require passing grade).
- Documentation/decision exercise submitted (require submission).

Evidence Generated by Learner Completion

- Activity-completion timestamps (time-on-task evidence).
- Knowledge-check score and attempt log.
- Submitted exercise artifact (retained ≥ 4 years; no PHI).

Moodle Activity Recommendations

- Page
- Book
- Glossary
- Quiz (KC2)
- Assignment (worksheet)
- Database

Accessibility Considerations

- Captions + transcripts for any media; semantic headings; alt text on diagrams.
- Sufficient color contrast; no color-only meaning; keyboard-navigable activities.
- Accessible downloadable templates (tagged PDF + DOCX); extended-time accommodation supported.
- Target WCAG 2.1 AA on the built course.

PHI / Privacy Guardrails

- All cases fictional and de-identified; no real patient/resident/family/facility data.
- Pre-load template with fictional data; field-level 'no PHI' reminder.
- Submission reminders and (for capstone) attestation + manual PHI review.

SME Review Flags

- [[SME REVIEW REQUIRED]] Validate the care-plan template against current nursing-process standards.

Compliance Review Flags

- [[COMPLIANCE REVIEW]] Pre-load template with fictional data; field-level 'no PHI' reminder.

Internal Answer Key Appendix (ADMIN / FACULTY ONLY - DO NOT SHOW LEARNERS)

Item ID	Type	Correct answer	Rationale	Remediation
KC2-Q1	Multi-select	B, C	Objective data are measurable/observed; A and D are patient-reported (subjective).	Review Reading 2.2 (subjective vs. objective).
KC2-Q2	MCQ	B	B is measurable, time-bound, and patient-performed; the others are vague or not patient-centered.	Review Reading 2.4 (writing goals).
KC2-Q3	MCQ	B	Transportation access is a social determinant of health affecting care.	Review Reading 2.2 (SDOH).

Debrief / Remediation Guidance

Discuss how an SDOH barrier reshapes goals and interventions, and how a quick bias check prevents assumptions about 'noncompliance.' Failed attempts route to Reading 2.2/2.4 before retry.

Application-Packet Defensibility Notes

Direct nursing assessment and care planning are unambiguous registered-nursing practice, strongly supporting BRN content relevance.

Program-structure note: This module is part of the 30-contact-hour, 10-module RN case management program (10 modules x 3 contact hours; 50 instructional minutes = 1 contact hour; minimum 1,500 instructional minutes, 1,680 design minutes). The official BRN contact-hour map and transfer worksheet are aligned to this 30-contact-hour structure. Any earlier 4-contact-hour representative course is superseded and is not part of the current BRN CEP signer-review package. [[SME REVIEW REQUIRED BEFORE SUBMISSION]]

Do not advertise, issue certificates, or represent this course as BRN-approved until the official BRN CEP approval and provider number are issued.
