REVIEW PACKET

ONLINE CE — SIGNER-REVIEW BINDER

CI Institute of Nursing | Application Packet | Draft Review Materials

NO PUBLIC APPROVAL CLAIM IS MADE UNLESS AGENCY APPROVAL METADATA IS ISSUED

CI Institute of Nursing, Inc.

PREPARED BY TJ PADILLA · JUNE 9, 2026

STATUS: DRAFT / PENDING APPROVAL

Ready for verification, signature, and submission review.

1. PACKET PURPOSE AND USE

Use this clean folder as the working end-user packet for final review, signatures, payment preparation, submission, reviewer access, and post-submission tracking. Do not submit source folders or internal build artifacts.

2. What Is Submitted and Not Submitted

Submit the lane application binder, minimum required submission packet, official forms ready for signature, required payment/check item, checklist, and lane course-material attachments when required by the agency.

- Do not submit raw source documents, scripts, build logs, old one-page module fragments, generated scratch files, internal reference archive, or unapproved public-language drafts.

3. Signatures, Initials, Dates, and Payments

Use each lane's submission checklist. Confirm all signature/date fields on official forms before submission. Confirm payment/check attachment requirements: CNA no fee identified in the final packet; RCFE vendor/course fees per CDSS notices; BRN \$750 payment/check attachment confirmation.

4. Vanessa Instructor/SME Evidence

Verify Vanessa Valerio, RN 788389 only where source-backed. Attach current instructor/SME evidence required by the lane. Internal SME approval is educational/clinical review only and does not replace agency approval.

5. Official Forms and Course Materials

Confirm official forms are unbranded, visually unaltered, and ready for final signature/date. Confirm each lane has a course-materials folder with compiled materials, course matrix/map, raw LMS content PDF, and build workbook.

6. Catalog and Website Updates

Use the CE Catalog Addendum and Website Update Guide in this folder. Create a separate Continuing Education section and keep all programs in interest-list-only mode while pending approval. Resolve the primary phone-number inconsistency before public release.

7. Application Submission Workflow

For each lane: final-review the application binder, confirm official forms, confirm signatures/dates, attach required course materials, confirm payment/check item, submit through the agency-required channel, save proof of submission, and log confirmation/date in the tracker.

8. Retain Proof and Respond to Deficiencies

Retain submission receipts, email confirmations, mailed tracking receipts, screenshots of agency upload confirmations, and any assigned agency IDs. Record the next expected response date and owner.

Deficiency-Response Workflow

- Save the deficiency notice in the internal records folder.
- Identify the affected lane and create a deficiency response tracker item.

9. VANESSA/SME REVIEW AND ALDRIN/DAGNY HANDOFF

- Assign an owner and classify the deficiency as form-related, payment-related, course-content-related, instructor-evidence-related, catalog/public-language-related, reviewer-access-related, or approval-metadata-related.
- Collect the corrected document while preserving the original and corrected version.
- Update the missing/pending item PDF if needed and prepare a concise response cover page.
- Submit the response through the agency's required channel and record submission date, confirmation, and next expected agency response.
- Do not update public approval claims until agency approval is actually issued.

Moodle development may not start until Vanessa Valerio, RN or another approved SME has reviewed and approved the course materials for educational, clinical, and compliance accuracy. Aldrin and Dagny may review requirements for planning only before SME approval. They must not begin course-shell build, content import, learner access setup, assessment import, certificate configuration, or production LMS development until SME approval is documented.

10. After Agency Approval

Only after applicable agency approval and issued metadata exist: update catalog/website status, configure certificate metadata, activate learner-facing approval language, open enrollment if authorized, and issue certificates only through the approved gate rules. Until then, enrollment for credit, certificate issuance, learner-facing approval claims, and public advertising claims remain disabled.
