

# READ ME FIRST - Google Drive End-User Packet

This is the normalized end-user packet. Each lane contains one complete signer-review binder, one primary compiled course packet, supporting matrix/crosswalk PDFs, unbranded official government forms, and a final verification checklist.

Do not use certificates, advertising claims, provider numbers, vendor numbers, or course approval numbers until regulator approval is issued.

Individual module PDFs are not the primary end-user route. They are excluded from this Google Drive packet except as source/archive references in the repository.

## Application Submission Workflow

Yadvir should use the compiled signer-review binder and official forms for each lane as the working application submission packet. Before submission, verify that each required form is complete, all signature/date/payment fields are ready, Vanessa evidence is attached where required, reviewer access is valid where required, and no files from 99\_NOT\_FOR\_SUBMISSION\_REFERENCE are included in the submission package.

### CNA / CDPH CE

- Review the CNA compiled signer-review binder.
- Verify CDPH 192B and CDPH 193 are ready for final signature/date.
- Verify course list, 24-hour / 12-unit online CE structure, instructor evidence, and certificate controls.
- Confirm no clinical hours are represented as online CE.
- Submit only the approved application packet/forms and required attachments.

### RCFE / CDSS CTP

- Review the RCFE compiled signer-review binder.
- Verify LIC 9141 vendor application and LIC 9140 course approval forms.
- Verify the filed 9-course / 27-hour packet only.
- Confirm the future 40-hour / 12-module RCFE concept is not submitted as current.
- Verify Vanessa instructor evidence attachment/currentness.
- Verify payment/check requirements before submission.

### BRN / CEP RN Case Management

- Review the BRN compiled signer-review binder.
- Verify BRN CEP application materials and 30-contact-hour / 10-module course package.
- Use "contact hours," not CEUs, as the primary term.
- Confirm no stale 4-contact-hour language remains.
- Confirm certificate language remains disabled until BRN provider metadata is issued.

## Vanessa Course Review and Approval Handoff

After Vanessa Valerio, RN reviews and approves the course content for educational and clinical accuracy, provide the Moodle build requirements and course-content package to Aldrin and Dagny for implementation planning.

## Provide Aldrin and Dagny

- Moodle self-host implementation requirements folder:
  - \_\_Master-Application-Packet\MOODLE\_SELF\_HOST\_IMPLEMENTATION\_MVP
- Moodle course-content build folder:
  - \_\_Master-Application-Packet\MOODLE\_COURSE\_CONTENT\_READY\_FOR\_BUILD
- Course-specific course content:
  - CNA 24-hour / 12-unit course content
  - RFE 9-course / 27-hour course content
  - BRN 30-contact-hour / 10-module course content
- Completion and certificate rules
- Activity/interaction maps
- Moodle question-bank CSV files
- Moodle build workbooks
- Reviewer access requirements
- PHI/privacy controls
- Approval-gated certificate rules
- Open items and final human-verification list

## Boundary Note

Vanessa review/approval is an internal educational/clinical review step. It does not replace CDPH, CDSS/ACS, or BRN approval. No learner-facing approval claim, advertising claim, or certificate issuance should occur until the applicable government agency approval and issued metadata are received.

## Do Not Give Aldrin and Dagny

- Official government forms for editing
- Student-only binders as build source
- Source folders
- NOT\_FOR\_SUBMISSION\_REFERENCE files
- Individual module PDFs
- Generated fragments
- Sketch scripts
- Image files
- PHI or real resident data

## Final Status Language

- Application submission packet: for Yadvir signer/submission workflow.
- Moodle requirements package: for Aldrin/Dagny implementation planning after Vanessa course review.
- Moodle course-content package: for Aldrin/Dagny Moodle build after Vanessa course review.

Agency approval remains pending until issued by CDPH, CDSS/ACS, or BRN.
