

CI Institute of Nursing

CNA Recertification Theory + Optional Clinical Support

CDPH / TPRU Readiness Project Binder

Prepared for Team Execution and Compliance Review

Prepared by	TJ Padilla
Project Oversight	Dee Bustos
Website	ciinstituteofnursing.com
Address	419 E Hamilton Ave, Campbell, CA 95008
Prepared	June 3, 2026
Status	Internal Execution Packet / Not Production Approved

Guardrail: no CDPH/TPRU approval claim, no production certificate issuance, no clinical-hour credit claim, and no learner-facing final answer keys.

1. Executive Summary

This binder is an internal execution and compliance-review packet for a 12-hour asynchronous CNA recertification theory pathway with a separate Optional Clinical Support hub. It summarizes the source evidence, ContentV2 status, assessment protections, certificate gate blockers, app review status, QA controls, and owner decisions needed before any external claim or certificate action.

Executive Area	Current Evidence	Status
Exists	Unified blueprint, Phase 0 compliance foundation, ContentV1 packet, ContentV2 package, survey evidence, reconciliation tracker, standalone MVP files.	Drafted
In progress	Source repair, time-depth expansion, app/runtime verification, Google Drive review packaging, QA negative testing.	In Progress
Blocked	Approval metadata, NAC/provider details if applicable, approved certificate wording, affidavit/e-sign method, active-time validation, compliance/legal/owner clearance.	Blocked
Cannot happen yet	CDPH/TPRU approval representations, production certificate issuance, certificate downloads, clinical-hour credit claims, learner-facing final answer keys.	Blocked

2. Gate Status

Gate Rule	Status / Required Boundary
Internal execution	Execution may continue internally.
Regulatory/production claims	No CDPH/TPRU approval claims, production certificate issuance, certificate downloads, or clinical-hour claims until final clearance.
Optional Clinical Support	Remains separate, optional, non-credit, non-gating, and not clinical-hour credit.
Assessment protection	Final answer keys and rationales remain internal/admin-only.

3. Status Matrix

Area	Status	Executive Note
Source package	Drafted	NATP Modules 10-17 source-backed instructional map is current; no source-repair or SME flags remain in generated validation.
NATP mapping	Drafted	72 objectives mapped; 64 covered and 8 deferred for hands-on/clinical context; 0 source-repair and 0 SME-review dispositions.
ContentV2 package	Drafted	9 modules, 77 lessons, 450 cards, and 450 narration clips; package-neutral M00 orientation applies to Package A/B/C.
Time-depth reconciliation	Drafted	Required theory remains 720 minutes; displayed lesson flow is 750 minutes including orientation, with 782.73 estimated active-learning minutes.
App / standalone MVP	Needs App Verification	Standalone MVP files present; runtime/browser verification not completed in reconciliation evidence.
Module assessments	Drafted	Module checks mapped; internal scoring only.
Final exam	Drafted	50-question pool mapped; final answer keys/rationales admin-only.
Certificate gate	Blocked	Approval metadata, approved wording, active-time, and affidavit method missing.
Active-time evidence	Blocked	Plugin/manual method not validated; Moodle logs alone are insufficient.
Affidavit/e-sign	Needs Legal/CDPH Review	Affidavit text exists; production method not approved.
Optional Clinical Support	Needs Compliance Review	Separate support pathway; runtime separation verification pending.
TTS/media	Deferred	Planning-only unless owner/legal/compliance authorize.
Audit packet	In Progress	Reconciliation documents and tracker exist; missing URL evidence remains.
Google Drive review package	Needs Owner Decision	59 URL rows remain undocumented; Drive links pending owner supply.
Leadership approval	Needs Owner Decision	Dee approval must follow evidence, QA, legal, and compliance clearance.

4. Project Charter

Field	Value
Institution	CI Institute of Nursing
Program	CNA Recertification Theory + Optional Clinical Support
Binder	CNA Recertification Project Binder
Purpose	Executive execution packet and compliance evidence map; not an approval packet.
Project Oversight	Dee Bustos
Prepared by	TJ Padilla
Physical address	419 E Hamilton Ave, Campbell, CA 95008
Website	ciinstituteofnursing.com
Required theory minutes	720 minutes / 12 hours
Optional support status	Optional, non-credit, non-gating, not clinical-hour credit
Production certificate status	Disabled pending approval metadata, active-time validation, approved wording, affidavit method, and final clearance

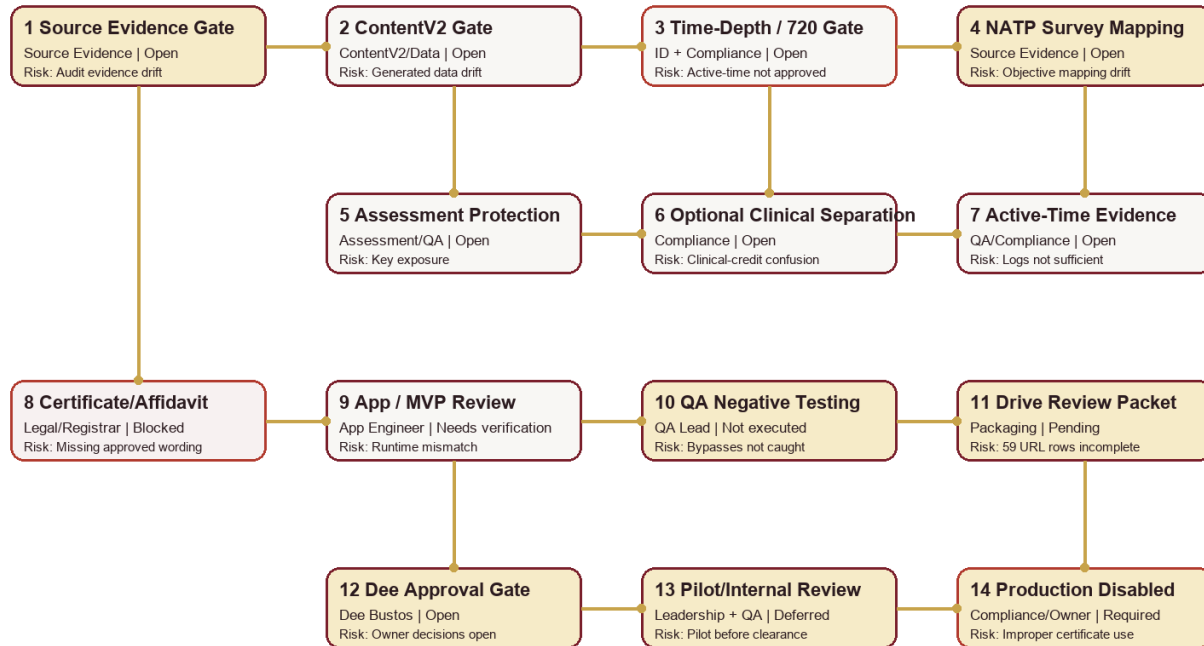

5. Team Execution Summary

Team	Provided	Action Steps	Output
Compliance	Phase 0 and gate rules	Validate approval metadata, certificate wording, affidavit method, active time, claims language	Clearance memo / blocker closure
Course Development	ContentV1 and ContentV2 modules	Close source-backed depth gaps; keep no-padding rule	Reviewed module package
Source Evidence / NATP	NATP 10-17 mapping	Maintain objective coverage evidence and deferred clinical-context boundaries	Updated evidence map
ContentV2 / Data	JSON/TS package and generated maps	Keep generated data synchronized with ContentV2 source of truth	Canonical release candidate
App / Standalone MVP	Prototype app and data adapters	Run runtime verification and route checks	QA evidence packet
Assessment / QA	Module/final maps	Protect keys, run negative tests	QA acceptance report
Certificate Gate	Gate specs and draft fields	Block until approvals are documented	Locked certificate plan
TTS / Media	Narration planning artifacts	Await owner/legal authorization	Approved media decision
Google Drive Packaging	Manifest and URL register	Re-export failed docs; owner decision on videos/folder	Complete review package
Leadership	Owner decision role	Approve go/no-go only after P0 closures	Dee approval record

6. Critical Path Flowchart

The following full-page visual shows the dependency flow from source evidence through production-disabled control. Parallel workstreams converge on QA, packaging, leadership approval, and final clearance.

CNA Recertification Critical Path Flowchart

CI Institute of Nursing - CNA Recertification Project Binder / TJ Padilla

7. Critical Path Task Table

Workstream	Task	Owner	Dependency	Duration / Effort	Gate	Status	Risk if Delayed
Source Evidence	Maintain NATP 10-17 objective evidence	Source Evidence	Local source docs	Medium	Source Evidence	Drafted	Evidence drift if source maps diverge
Course Content	Keep ContentV2 package-neutral orientation synchronized	ContentV2 / ID	Source Evidence	High	ContentV2	Drafted	Learner package labels could drift
Time Depth	Preserve 720-minute normalized model and active-learning audit	ID + Compliance	ContentV2	High	720-Minute	Drafted	Active-time method still needs approval
Assessment	Protect final pool and remediation boundaries	Assessment / QA	ContentV2	Medium	Assessment	Drafted	Answer-key exposure risk
Clinical Separation	Verify optional clinical is non-gating	Compliance / QA	App review	Medium	Clinical	Needs Compliance Review	Learner misperception of credit
Active Time	Validate plugin or manual hold	QA / Compliance	Staging method	High	Active-Time	Blocked	Certificate gate cannot clear
Certificate	Approve metadata, wording, and affidavit method	Legal / Registrar	Approval artifacts	High	Certificate	Blocked	Improper certificate issuance
App	Run standalone MVP browser verification	App Engineer	ContentV2 package	Medium	App Review	Needs App Verification	Route/content mismatch
QA	Run negative tests	QA Lead	App and gate config	Medium	QA	Not Started	Bypass defects remain unknown
Packaging	Complete Google Drive review packet	Packaging	URL imports/decisions	Medium	Drive Packet	Needs Owner Decision	Missing evidence at review
Leadership	Dee approval after P0 closure	Dee Bustos	All gates	Low	Leadership	Needs Owner Decision	Premature pilot decision
Release Control	Keep production disabled until clearance	Compliance / Owner	Leadership gate	Ongoing	Final Gate	Blocked	Unauthorized production use

8. Course Structure and Module Map

Module	Title	Minutes	Lessons	Cards / Current Evidence	Status	Key Source	Review Flag	Next Action
M00	Orientation and Compliance Boundaries	30	5	30 allocated / 5 reusable package-neutral lessons	Drafted	Orientation/compliance exception	Compliance/legal review before production	Use for Package A, Package B, and custom Package C
M10	NATP Module 10: Vital Signs	83	17	83 allocated / 95.78 active-learning min	Drafted	NATP Module 10	None identified	Maintain source-backed coverage
M11	NATP Module 11: Nutrition	55	10	55 allocated / 62.97 active-learning min	Drafted	NATP Module 11	None identified	Maintain source-backed coverage
M12	NATP Module 12: Emergency Procedures	55	10	55 allocated / 67.25 active-learning min	Drafted	NATP Module 12	None identified	Maintain source-backed coverage
M13	NATP Module 13: Long Term Care Resident	138	16	138 allocated / 148.81 active-learning min	Drafted	NATP Module 13	None identified	Maintain source-backed coverage
M14	NATP Module 14: Rehabilitative Nursing	55	10	55 allocated / 64.06 active-learning min	Drafted	NATP Module 14	None identified	Maintain source-backed coverage
M15	NATP Module 15: Observation and Charting	111	10	111 allocated / 107.03 active-learning min	Drafted	NATP Module 15	None identified	Maintain source-backed coverage

Module	Title	Minutes	Lessons	Cards / Current Evidence	Status	Key Source	Review Flag	Next Action
M16	NATP Module 16: Death and Dying	55	8	55 allocated / 63.03 active-learning min	Drafted	NATP Module 16	None identified	Maintain source-backed coverage
M17	NATP Module 17: Patient/Resident Abuse	168	1	168 allocated / 138.31 active-learning min	Drafted	NATP Module 17	None identified	Maintain source-backed coverage

9. Source Evidence and CCCCCO Coverage

Evidence Area	Inspected Finding	Status
NATP modules	Modules 10-17 are mapped to the current 720-minute theory package; M00 is a reusable orientation/compliance exception.	Drafted
Coverage rollout	72 objectives mapped; 64 covered and 8 deferred for hands-on/clinical context; 0 source repair, 0 out of scope, and 0 SME review.	Drafted
Gaps	No ContentV2 depth gap or failing lessons remain in the audit; hands-on skills remain deferred to clinical/support context.	Drafted
Survey language	No survey/audit approval is claimed; coverage is evidence mapping only.	Needs Compliance Review

10. ContentV2 and Time-Depth Status

Measure	Evidence
Required theory model	720 minutes / 12 hours declared and inherited from ContentV1 syllabus.
Pipeline counts	9 modules, 77 lessons, 450 cards, and 450 narration clips.
Current gap	Content-depth gap is 0; time-depth audit estimates 782.73 active-learning minutes and 0 failing lessons.
No-padding rule	Gaps are reported and must be closed only with source-backed expansion; narration/assessment/clinical support do not replace the 720 model.
Open modules	No modules are failing the ContentV2 time-depth audit; production release still depends on certificate, active-time, legal/compliance, and app QA gates.

11. Assessment and Final Exam Protection

Control	Status / Evidence
Module checks	Module assessment map exists; questions are internal-scored with remediation direction only.
Final assessment pool	50-question pool mapped to sources; answer keys and rationales remain internal/admin-only.
Learner result boundaries	Final failed result should be topic-level only; no full key or rationale exposure.
Review flags	Infection control and skin integrity questions preserve SME-review flags.

12. Certificate Gate, Affidavit, and Active-Time Controls

Required Control	Current Status
Approval metadata / NAC/provider details	Missing; P0 blocker.
Approved certificate wording	Missing approval; draft mapping is not enough for production.
Affidavit/e-sign method	Missing legal/CDPH/owner approval; wet-sign fallback may be needed.
Active-time validation	Missing; Moodle logs alone are insufficient.
Certificate production	Disabled until all approval, affidavit, active-time, and clearance evidence is documented.

13. Optional Clinical Support Separation

Optional Clinical Support remains optional, non-credit, non-gating, and not clinical-hour credit. Skipped clinical-skill videos in the export are an owner decision for the support pathway only and do not change required theory credit.

Separation Control	Status	Next Step
Separate pathway	Needs Compliance Review	Verify app labeling and navigation.
Non-credit label	Needs Compliance Review	Confirm no clinical-hour claim.
Not certificate gate	Needs App Verification	Run QA-02: skip clinical and confirm certificate path unaffected.

14. App / Standalone MVP Status

Area	Evidence	Status
V2 UI / MVP	Standalone app README describes browser-usable prototype only; not final Moodle production course.	Internal Review
ContentV2 wiring	Generated ContentV2 adapter/data files referenced in reconciliation.	Needs App Verification
Lesson routing	App files present; runtime/browser verification not run in documentation pass.	Needs App Verification
Production controls	README states no real certificates, no real learner data, and no PHI collection.	Drafted

15. Audit Packet and Reconciliation Evidence

Evidence	Status / Note
Reconciliation folder	Contains executive summary, crosswalks, certificate/active-time, QA, blockers, and URL evidence register.
Export tracker	Master tracker workbook exists in reconciliation evidence; current task creates a CNA executive task tracker.
Spreadsheet URL evidence	162 URLs classified; 59 still undocumented; sheet/row/cell extraction pending.
Google Drive package	Pending final Drive links and owner decisions; no final review package claimed.

16. QA Negative Tests and Acceptance Controls

Risk	Negative Test	Expected Result	Status	Evidence / Next Step
PHI entry	Attempt PHI entry/upload	No PHI requested, typed, uploaded, shown, or implied	Not Started	Run QA-01
Optional clinical gating	Skip clinical support	Theory/certificate path unaffected	Not Started	Run QA-02
Final answer key exposure	Review learner final result	No keys/rationales visible	Not Started	Run QA-03
Certificate download	Attempt download before clearance	Certificate unavailable/disabled	Not Started	Run QA-04
Active-time bypass	Idle/multi-tab/direct access	Time cannot be satisfied by bypass	Not Started	Run QA-05
Missing approval metadata	Blank provider/approval fields	Gate blocks output	Not Started	Run QA-06
Source-repair content	Try marking flagged content reviewed	Flag remains until evidence exists	Not Started	Run QA-07
App route mismatch	Navigate all modules/routes	Only verified content displays	Not Started	Run QA-10
TTS/media not authorized	Trigger narration/audio production	Planning only; no production audio	Not Started	Owner/legal decision

17. Remaining Blockers and Owner Decisions

Priority	Decision / Blocker	Owner	Status
P0 Blocker	Approval metadata, NAC/provider details if applicable, approved certificate wording, affidavit/e-sign method, active-time validation, legal/compliance clearance before production claims	Program Owner / Legal / Compliance	Open
P1 High	Runtime app verification, optional clinical separation QA, active-time evidence validation, and package A/B/C orientation labeling review	Compliance / App QA	Open
P2 Medium	TTS/media authorization and generated-data sync checks after future ContentV2 changes	Owner / ID	Open
P3 Low	External-reference URL notes and formatting polish after evidence closure	Repo Auditor	Open

18. Final Approval Gate

Execution may continue internally.

Do NOT proceed until final clearance	Required before production/pilot clearance
Submit or represent CDPH/TPRU approval; publish approval claims; enable production certificate issuance; enable certificate downloads; issue CNA renewal certificates from this MVP; claim clinical-hour credit; count Optional Clinical Support as required theory or clinical credit; use provider/NAC/course approval metadata before issued/confirmed; release learner-facing final answer keys.	Source evidence verified; ContentV2 finalized; time-depth plan approved; active-time validation approved; certificate wording approved; affidavit/e-sign method approved; SME/compliance review completed; app QA completed; Dee approval completed.
