

CI INSTITUTE OF NURSING

CERTIFIED NURSE ASSISTANT
TRAINING PROGRAM

Module 15: Observation and Charting

CI INSTITUTE

MODULE 15: OBSERVATION AND CHARTING

Minimum Number of Theory Hours:

4

Recommended Clinical Hours:

4

Module 15: Observation and Charting

CI INSTITUTE

STATEMENT OF PURPOSE

The purpose of this unit is to prepare students to know how, when, and why to use objective and subjective observation skills. They will report and record observations on appropriate documents using medical terms and abbreviations.

TERMINOLOGY:

1. Abbreviation
2. Activities of Daily Living (ADL)
3. Assessment
4. Assessment Reference Day (ARD)
5. Incident report
6. Kardex
7. Minimum Data Set (MDS)
8. Objective
9. Observation
10. Paraprofessional Healthcare Institute (PHI)
<http://phinational.org/about/>
11. Prefix
12. Range of Motion (ROM)
13. Resident Assessment Instrument (RAI)
14. Resident Assessment Protocol (RAP)
15. Patient/resident care plan
16. Root word
17. Subjective
18. Suffix

Patient, resident, and client are synonymous terms referring to the person receiving care

PERFORMANCE STANDARDS

Upon completion of the four (4) hours of class plus homework assignments and four (4) hours of clinical experience, the learner will be able to:

1. Define key terminology
2. Identify word elements used in medical terms
3. Identify medical terminology and abbreviations commonly used in medical facilities
4. Define observation and list the senses used to observe a patient/resident.
5. Describe objective and subjective observations
6. Explain Patient Care Plan and List types of charting documents and the use for each
7. Explain how to accurately complete ADL assessment for MDS
8. Discuss procedures and use of legal issues to use when recording on a patient's/resident's chart

/// DEFINE KEY TERMINOLOGY

- A. Review the terms listed in the terminology section
- B. Spell the listed terms accurately
- C. Pronounce the terms correctly
- D. Use the terms in their proper context

Identify word elements used in medical terms.

A. Medical words are composed of several small words or word elements

B. Word elements

1. Root
2. Prefix
3. Suffix
4. Combining vowel

Identify medical terminology and abbreviations generally used in medical facilities.

A. Identify medical terminology and abbreviations from list determined by instructor

B. Abbreviations are/may be

1. A shortened form of words or phrases
2. Commonly used in health care settings
3. Designations for medical specialty areas: ER, OR, OB, etc.
4. Shortened forms of a word or the first letters of a word: amb, BRP, lab, etc.
5. A shortened form of a Latin or Greek word: ad lib, prn, po, etc.

C. Refer to facility policy on approved abbreviations

Discuss procedures and use of legal issues to use when recording on a patient's/resident's chart

A. Charting procedures

1. Make sure you have the correct chart or ADL sheet
2. Write legibly and neatly
 - a. Write notes on paper first
 - b. Check for accuracy and spelling
3. Place events in proper sequence
4. Chart according to facility/policy standards
5. Be concise and use appropriate terms and abbreviations
6. Always use ballpoint pen
 - a. Black ink
 - b. No felt tip, fountain pens, pencils or gel pens
 - c. Use color only if approved in facility policy
7. Errors – cross out with one line
 - a. DO NOT ERASE OR USE WHITEOUT
 - b. Write “error” above the line
- c. Initial the entry
8. Include patient's/resident's complete information on each page
 - a. Some facilities have imprint stampers
 - b. If not, write in patient's/resident's name and any other information as the facility mandates
9. Never skip lines
10. Signature example; J. Jones, Nurse Assistant or R. Smith, NA.
11. Always date and time entries – or make sure you are charting under correct date and time
12. Chart only procedures YOU HAVE PERFORMED – and only after you have performed the procedure
13. Never chart for someone else
14. Chart only those observations which you know to be true (objective data)
 - a. Do not chart opinions
 - b. Subjective data must be in quotation marks and exactly as the patient/resident states

Discuss procedures and use of legal issues to use when recording on a patient's/resident's chart

B. Computers and charting

1. Some facilities may have a computerized charting system
2. Basic principles of charting apply – confidentiality and privacy are important issues
3. Systems are password protected
 - a. Each user receives a personal password
 - b. Never share and/or use others' passwords
 - c. Sharing/using another's password may be grounds for termination

C. Legal issues of charting

1. Patient's/resident's record is a legal document; it can be used in a court of law
2. Information in the chart must be kept confidential
3. Information in the chart should be accurate, objective and truthful
4. The Nurse Assistant has access only to the charts of the patients/residents for whom they are caring
